JUB

SINCE 1910
JUB HOLLAND

COVER STORY

A Mysterious Dutch Still Life – A theatrical floral design by JUB Holland and landscape designer Carien van Boxtel for Keukenhof 2025. A layered spring scene rich in depth and contrast: a diverse mix of tulips and naturalising bulbs, where deep reds and nuanced pink tones act as subtle invitations, brings the poetic beauty of 17th-century floral still lifes to life.

Signature projects

A SELECTION OF INSPIRING, RECENT PROJECTS THAT SHOW WHAT'S POSSIBLE WITH FLOWER BULBS IN PRACTICE

Bratislava, Slovakia: Rich tulip mixtures bringing colour to Medická zahrada public park

Madrid, Spain: Tulip garden for the Royal Palace (Plaza de Oriente), donated by Dutch Crown Princess Amalia

Atomium, Brussel (Belgium): Seasonal flowering as a bold accent at an iconic landmark

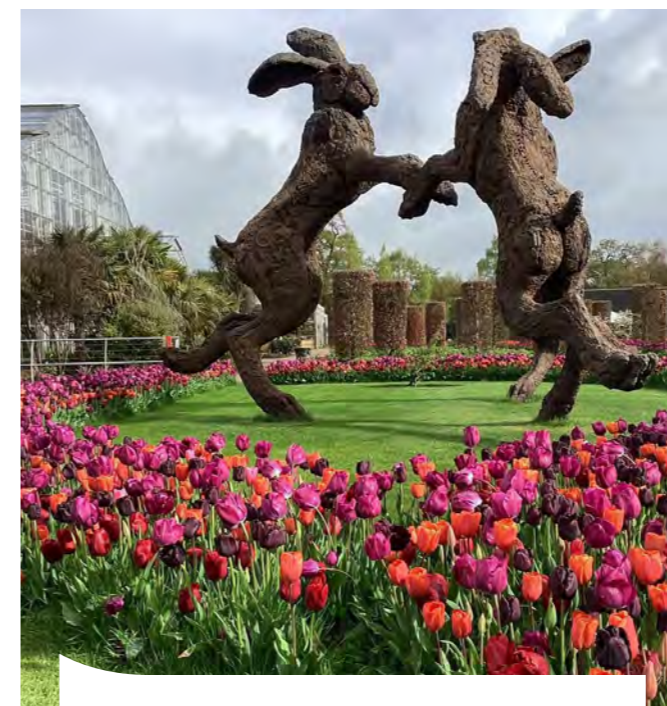

Alkmaar, the Netherlands: Bath Mixture as part of urban greening – winning project of the Green Cities Europe Award 2024

Northamptonshire, United Kingdom: The Vibrant Verge at Lampport Hall & Gardens

Thornton-le-Dale, United Kingdom: Mixture Ede at Warrington House

RHS Garden Wisley, United Kingdom: Royal Horticultural Society tulip show garden

Your partner in flower bulbs

FOUR GENERATIONS OF CRAFTSMANSHIP

SINCE 1910

JUB Holland is a leading family business in the bulb sector, active since 1910. As **Royal Supplier of Colour**, a Keukenhof exhibitor from the very beginning, and the main construction site for the Flower Parade of the Bulb District, JUB is rooted in the craft. For four generations, expertise, innovation and a love of nature have shaped everything we do. You'll see that continuity in our quality, in the way we work, and in the long-standing partnerships across Europe.

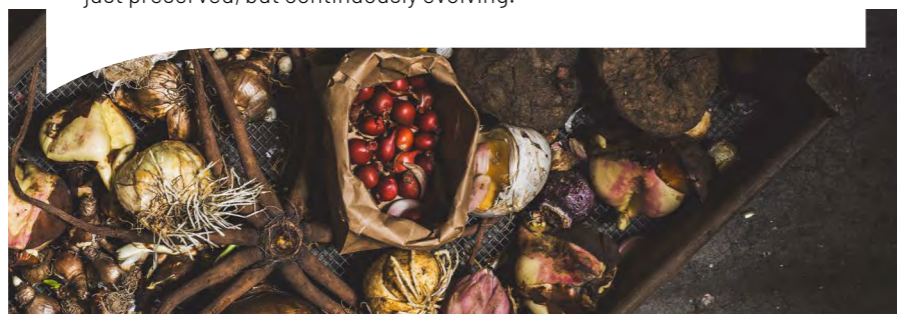

THE SUPPLY CHAIN IN-HOUSE

JUB Holland is one of the few companies in the sector with full control of the chain. Breeding, growing, trading and packing take place within one organisation. That means we know what performs – and what doesn't – and translate that into dependable, sustainable choices. On our own 25-hectare nursery we grow top-quality tulip, daffodil and camassia bulbs, fully MPS-A and On the way to PlanetProof certified. It keeps us transparent and flexible – from bulb to presentation, from landscape to retail.

BREEDING WITH VISION

As a partner within Remarkable Tulips, we work with other leading bulb growers and exporters on new, strong and exclusive tulip cultivars. With a focus on resilience, performance and distinctiveness, we develop varieties ready for tomorrow's demands.

KNOWLEDGE MADE VISIBLE

With over 800 varieties and mixtures, plus our own trial garden, knowledge at JUB never stands still. We share and deepen that expertise through research partnerships, the annual JUB Study Days, roadshows, trade fairs and presentations – keeping craftsmanship not just preserved, but continuously evolving.

LANDSCAPE IS TAILORED

No two locations or green projects are the same. Climate, soil, use and management all contribute to success. JUB Holland translates ambitions regarding colour, biodiversity and climate adaptation into plantings that work in practice – from parks to verges, from country estates to business parks.

SPECIALIST TEAM, SHORT LINES

Our JUB Holland team works daily with municipalities, contractors, designers and site managers across Europe. With in-depth knowledge of assortment, application and implementation, we contribute ideas from the initial sketch to the final realisation. Practical, personal and committed. See page 143 for our team.

DEVELOPED FOR PUBLIC GREEN SPACES

Our bulbs and mixtures are selected and composed for a wide range of landscape applications. Naturalising species, a growing organic range, and carefully built mixtures and combinations provide guidance for design

and maintenance. This results in robust plantings with long-lasting flowering, ecological value and management that is in line with practice.

INNOVATION THAT MAKES THE DIFFERENCE

JUB developed bulb-planting machinery back in the 1990s for fast, accurate planting under turf. Today we combine that experience with modern, sustainable planting methods and design tools such as the FlowerDesigner App and the Bloom Calendar fan. Design, planning and execution come together in solutions that make sustainable planting possible at any scale.

JUB & Sustainability

A future-proof family business means choices that go beyond one season. JUB Holland works with clear goals: reducing environmental impact, strengthening biodiversity, creating a healthy workplace and building durable relationships. Discover how we make sustainability practical and contribute to the Sustainable Development Goals.

SUSTAINABLE BULB PRODUCTION

- MPS-A and On the way to PlanetProof certified bulbs from our own nursery
- 30-60% less phosphate leaching to surface water thanks to iron-sand drainage in the plots
- As a CAP demonstration company (BOLDER), we share our knowledge and practical experience in reducing the use of crop protection products
- Ecological trial field in collaboration with Living Lab B7
- Tulip breeding on virus resistance and plant resilience with breeding partner Remarkable
- Our organic range (contract-grown with a SKAL-certified grower) expands every year
- Active participation in Regional certification of the Dutch Dune and Bulb Region

◀ Applying wood fibre as an alternative to chemical weed control

JUB AS DEMONSTRATION COMPANY

Within BOLDER we host demonstration days, workshops and field trials with practical insights – from drift reduction and organic matter accumulation to nearly chemical-free daffodil cultivation. A place where theory, practice and innovation come together.

PRODUCTION & MATERIALS

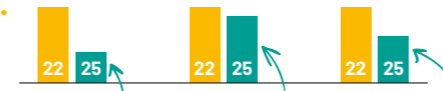

Step by step, we move towards a more circular supply chain, with sustainable sourcing and transparency as the baseline, supported by strong standards and traceable production.

- Member of Sustainable Suppliers of Horticultural Quality Products (FSI aligned)
- Packaging with >90% PCR film; 85% recycled PP tape; FSC cartons
- Reuse of displays, pallets and crates; six waste streams recycled locally

ENERGY & CO₂

- 100% Dutch green electricity; 971 solar panels
- Electric internal transport and company vehicles

Gas -60%, electricity -12%, total CO₂ -38% (2022-2025).

- CO₂-Awareness Certificate 2025, level 3.

"Less consumption, greater self-sufficiency"

Tip: The CO₂ Performance Ladder makes sustainable procurement simpler – and more effective.

BIODIVERSITY & LIVING ENVIRONMENT

Our company plots are set up as a living example of nature-inclusive practice.

- Upgraded nature-friendly banks, incl. landscape elements
- Ecological ditch management, retaining 10% bank vegetation
- Flower and herb mixtures that attract pollinators and beneficial insects
- Dedicated habitats for partridge and other "bulb birds"

Read the article about the redevelopment of our company surroundings

SUSTAINABLE EMPLOYABILITY

- We are committed in providing a safe, healthy and pleasant working environment
- Staff training and development
- Collaboration with organisations supporting people distanced from the labour market
- Internships and education projects

COLLABORATION

We build long-term partnerships with governments, knowledge institutes, businesses and educational institutes. By sharing knowledge, testing innovations and making insights accessible, we strengthen sustainable sector development.

"Craftmanship grows when you share it"

JUB Favourites 2026/27

*Tulipa
Willem van
den Akker*

Remarkable Tulips is a breeding collective for new tulip cultivars. JUB is an active member.

JUB FAVOURITES

Proven. Distinctive. JUB.
Essential performers that prove themselves year after year – alongside promising newcomers and varieties exclusively grown by JUB Holland. Selected for quality, appearance and usability in public green spaces.

Frank Uittenbogaard
Director - Nursery & Purchasing

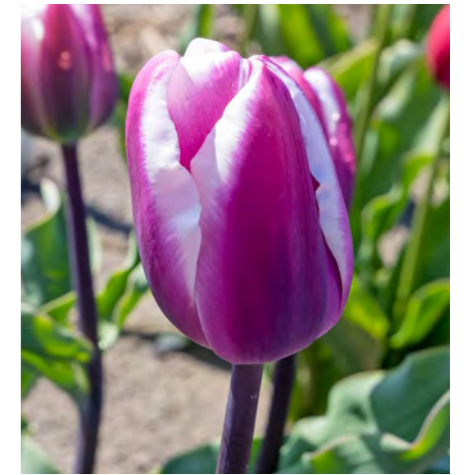

DREAMER TULIPA DOUBLE EARLY

An elegant tulip with volume – soft in tone, generous in flower.

- Double, peony-type bloom with immediate impact
- Pastel pink that holds evenly
- Strong for pots, cut-flower mixes and early border colour

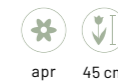

apr 45 cm

LIBRIJE TULIPA TRIUMPH

A stylish tulip with a distinctive two-tone effect.

- Deep purple with a sharp white edge
- Sturdy and resistant to changing spring conditions
- Long flowering; strong in borders and cut flower gardens

apr 45 cm

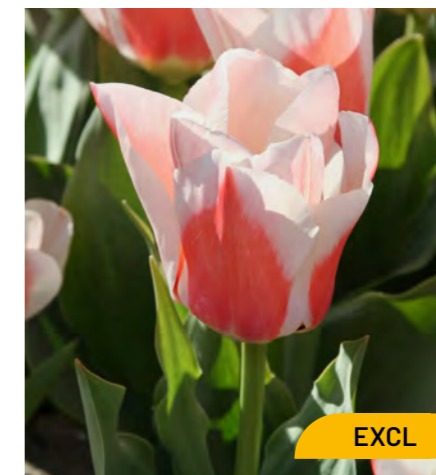

ORANGE SHERPA TULIPA TRIUMPH

Fresh spring bloomer – brightly coloured and pleasantly scented

- Warm orange tones with soft shading
- Lightly aromatic; stands out mid-season
- Reliable for pots, borders and cutting

apr-may 45 cm

WILLEM VAN DEN AKKER TULIPA GREIGII

A robust tulip with flair – strong on timing, detail and effect.

- Bright red with a white edge and dark centre – classic and bold
- Marbled foliage with early ornamental value
- Early, wind-firm, and grown exclusively by JUB Holland

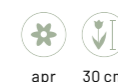

apr 35 cm

TRAUTTMANSDORFF TULIPA GREIGII

An early Greigii – compact, fresh and instantly visible.

- Warm, glowy red flower with marbled foliage
- Early, large-flowered, compact habit
- Strong for combinations; grown exclusively by JUB Holland

apr 30 cm

NEW

KUNYUN TULIPA DARWIN HYBRID

An elegant Darwin with a gentle colour gradient for large-scale plantings.

- Soft pink with apricot and gold highlights along the petal edge
- Large, classic blooms that open wide in sunlight
- Dependable return; strong in borders and pick-your-own areas

apr-may 55 cm

NEW

SWEET VALLEY TULIPA FOSTERIANA

Soft colour play – a well-filled double Fosteriana.

- Cream-white flower with green accents and a soft yellow base
- Well-formed double bloom, clean presentation
- Suitable for pots, borders and early landscape combinations

apr 35 cm

NEW

SAY CHEESE NARCISSUS TRUMPET

A compact daffodil with a bright, fresh look.

- Deep yellow trumpet with lightly ruffled petals
- Early and strong with stable, low growth
- Ideal for pots, underplanting and smaller borders

apr 30 cm

NEW

CANDLELIGHT CROCUS LARGE FLOWERING

A subtle season starter for early colour accents.

- Light blue flowers that stand out crisply against the winter ground
- Very early; often visible from February
- Reliable in naturalising, borders and underplanting

feb-mar 12 cm 200/m²

MIAMI ALLIUM LARGE FLOWERING

A powerful ornamental onion with lasting value in colour and structure.

- Dark purple, compact heads on sturdy stems
- Late; attractive to bees and butterflies
- Even after flowering, the dried seed heads retain their ornamental value

jun-jul 80 cm 20/m²

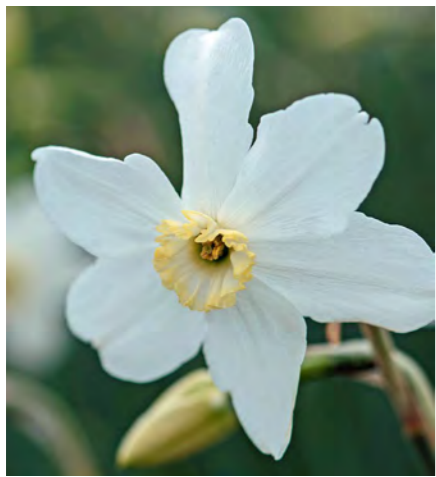

CUSICKII CAMASSIA

A strong camassia that adapts easily to varying conditions.

- Striking light-blue flowering with an open, generous effect
- Attractive to bees and other pollinators
- Robust, easy-going, suitable for varied climates

may-jun 80 cm

POLAR ICE NARCISSUS SMALL CUPPED

A fresh white daffodil with a heart-melting centre.

- Pure white petals with a small soft-yellow cup
- Strong, scented; ideal for borders, pots and naturalising
- Late flowering and dependable year after year

apr 50 cm

NEW

KAPITI PEACH NARCISSUS TAZETTA

A scented daffodil with warm colour accents for places where experience counts.

- Bright white with a peach-orange centre; multiple flowers per stem
- Lightly fragrant and early flowering
- Ideal for borders and pots

apr 40 cm

EXCL

PRINSES AMALIA NARCISSUS BOTANICAL

Fresh spring daffodil – subtle in colour, strong in presentation.

- Colours from soft cream to pure white with a light cup tone
- A selection from 'February Gold', also used in Royal gardens
- Grown exclusively by JUB Holland, Royal Supplier of Colour

apr 35 cm

SUNSET FRITILLARIA IMPERIALIS

A striking appearance that adds contrast and height.

- Bronze-coloured petals as a warm counterpoint to fresh spring tones
- Strong vertical accent
- Enhances the interplay of lines in mixed borders

apr-may 100 cm

GRAVETYE GIANT LEUCOJUM AESTIVUM

Robust where other spring bulbs struggle.

- Rich-flowering with elegant, bell-shaped white blooms
- Thrives in moist conditions and along watersides
- Planted groups bulk up year after year

may-jun 40 cm

SOCHI ORNITHOGALUM

A late ornithogalum with a full, even flower display.

- Very floriferous with bright white stars on sturdy stems
- Flowers later, creating an elegant season finale
- Suitable for borders and cut flower gardens

may-jun 60 cm

Design

The demand for long-term flowering in public spaces is increasing. Residents want colour and experience, decision-makers seek biodiversity gains, and site managers demand practical feasibility. It is precisely in this mix of interests that it is valuable to have a quick overview. With two complementary design tools, JUB Holland makes ambitions concrete and choices substantiated, in collaboration with our specialists.

BLOOM CALENDAR

The Bloom Calendar fan is the tangible start of every design conversation. At a glance, you see how naturalising bulbs succeed one another into a natural flowering arc from January to October.

WHAT IT SHOWS

- Succession through the seasons
- Colours and combinations
- Light and soil needs
- Flowering heights and planting densities

BENEFITS

- Easy to work with yourself
- Ideal overview for brainstorming and planning
- Supports choices on flowering window, colour focus and application

A master's mix of colour through the seasons

Bloom Calendar

FlowerDesigner App

FLOWERDESIGNER APP

The FlowerDesigner App translates customer requirements into concrete, deliverable bulb plans. Lifelike visualisations and clear calculations make

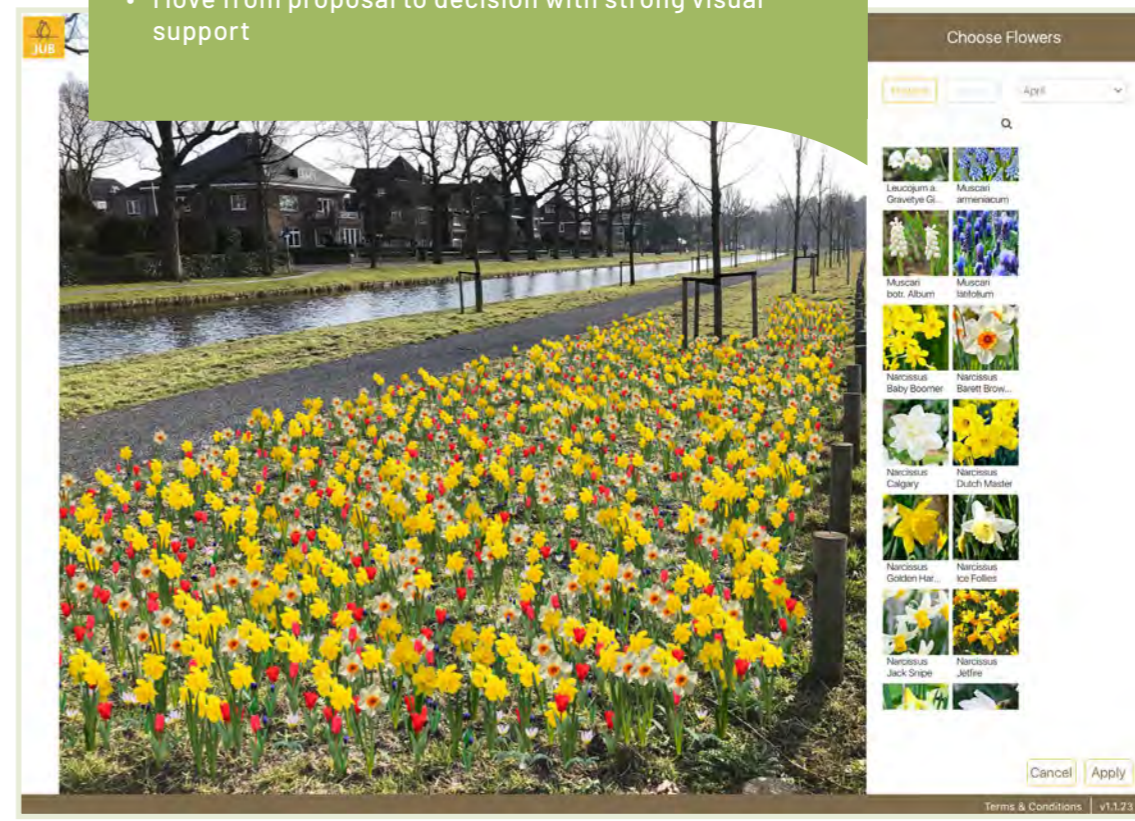

choices transparent and scenarios defensible – always aligned with location, application and maintenance.

WHAT THE APP DELIVERS

- See the end result in advance with realistic on-site visuals
- Instant insight into quantities, mixes and budget
- Compare multiple design options easily
- Move from proposal to decision with strong visual support

CHALLENGE US:

Send a photograph of your location and requirements. Our JUB Specialists will send a visualisation in return.

Shifting to extensive maintenance

FROM INTENSIVE MOWING TO FLOWER-LED MANAGEMENT

Maintenance pressure, drought and biodiversity targets call for a different approach to verges and lawns. Moving from intensive mowing to an extensive regime creates space for more nature value, more seasonal experience and less maintenance pressure. Flower bulbs give a quick, dependable start – visible for months, without complex management.

WHAT IS THE AIM?

- **Faster visible results** with fewer interventions
- **Lower maintenance pressure:** less mowing, reduced disruption to the grass
- **More biodiversity:** nectar, habitat and species variation
- **Greater visual impact and stronger public support:** a verge with added value, not only a tidy look

Tip: Start with areas where mowing is costly and delivers little return: verges, embankments, central reservations, roundabouts and low-fertility lawns.

WHY FLOWER BULBS WORK

- **Early start:** providing nectar and pollen for bees and pollinators when it is scarce
- **One planting moment, months of effect** – low maintenance
- **Naturally pairs** with native herb mixes and extensive grass management
- **Scalable:** from trial plots to kilometres of verge

FROM PLAN TO PRACTICE: CHOOSE YOUR ROUTE

ROUTE 1 – THE VIBRANT VERGE

A tailored bulb and wild flower mixture that promotes biodiversity, provides eight months of colour and attracts pollinators – all with just one mowing per year.

► Turn to page 16

ROUTE 2 – MIXTURES FOR VERGES & GRASS AREAS

Fast seasonal effect in grass: ready-made bulb mixes that perform in verges and lawns, delivering months of colour without complicated management.

► Turn to page 28

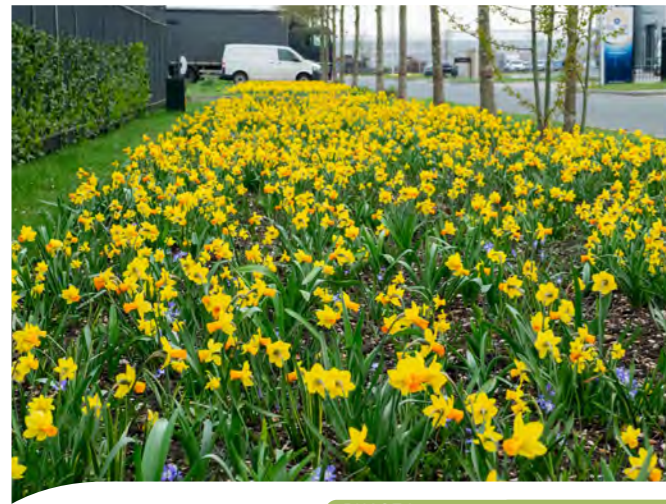

The Vibrant Verge

THE CONCEPT OF THE VIBRANT VERGE

The Vibrant Verge transforms monotonous grass verges into flowery ribbons teeming with biodiversity. By combining **wild flower mixtures** with a **custom flower bulb mix developed by JUB Holland**, a robust planting is created with **up to eight months of flowering**, from early spring until late autumn. With just one mowing per year, this concept offers long-lasting colour, low maintenance costs, and a valuable food source for **bees, butterflies, and other pollinators**.

A proven concept with impact. Discover The Vibrant Verge. Read all about the approach, projects, and services.

PHASE 1

PHASE 2

PHASE 3

PHASE 4

FOUR APPLICATIONS FORM THE BASIS FOR CUSTOM-MADE PROJECTS

COLOURFUL & BUZZING

Playful and accessible

A vibrant blend of naturalising and cultivated bulbs brings biodiversity to the urban landscape. Visually striking, low maintenance, biodiverse and delightfully unexpected.

PURE NATURE

100% organic, 100% impact

Fully organically grown flower bulbs. Focused on sustainable green projects with maximum ecological added value.

LIVING LEGACY

Naturalising bulbs in the landscape

Back to basic: naturalising bulbs restore ecological balance in public green spaces. Authentic and robust, weaving lasting rhythm into verges, park edges and semi-shaded greenspaces.

EDGE PLANTING

Flower bulbs in the shrub layer

Layered planting with flower bulbs and shrubs for colour and structure: biodiversity along the edge, between grassland and shrubs. Enhances shady edge plantings in parks, pathways, buffer zones and ecological corridors.

HOTELLO INSECTA

THE VIBRANT VERGE BAG

Increase biodiversity. Bring colour and nature closer with this beautiful blend of flower bulbs and wild flower seeds.

Present the bag as a gift for community projects. Ask our JUB Specialists for more information.

*For a verge that's more than just a strip of green:
a habitat, a seasonal experience, and a calling card for your community.*

Climate-conscious planting

FLOWER BULBS AS FLEXIBLE BUILDING BLOCKS IN A CHANGING CLIMATE

Drought, heavy rainfall, and temperature fluctuations are increasingly testing greenery. With the right variety selection, flower bulbs continue to perform reliably – in sandy roadsides, stony urban areas, and damp lowlands. Thanks to their efficient growth cycle, strong root structure, and energy reserves within the bulb, they flourish where other plants struggle.

PRAIRIE-MIXTURE

- Tolerates high temperatures and dry conditions
- Strong rooting and minimal water requirements
- Abundant flowering, combines well with perennials

Tip: Ideal for sunny, dry verges, poor soils, stony areas and extensive plantings without irrigation – such as prairie plantings, rock gardens and sunny embankments.

From a salty piece of no man's land to a thriving landscape – view the story

BULBS FOR DRY LOCATIONS:

Chionodoxa Botanical daffodils Botanical tulips Camassia Ornithogalum Iris hollandica Allium small-flowering

Prairie mixture

Wadi mixture

BULBS FOR SEASONALLY MOIST SITES:

Galanthus Fritillaria meleagris Muscari Botanical daffodils Leucojum Camassia Allium sicutum

WADI MIXTURE

- Tolerates temporary waterlogging
- Deep-rooting and reliable return
- Long flowering period with a naturalistic character

Tip: For natural plantings in rainwater buffers or low-lying areas. Perfect for wadis (temporary water retention), stream valleys, and moist park areas.

NEED ADVICE OR WANT TO ORDER?

Our specialists will help you choose the right species or mixture for specific soil and climate conditions. From drought-resistant verges to moist wadis, we're happy to assist you with design and maintenance.
▶ Turn to page 143 for our JUB Specialists.

Well-being in public spaces

FLOWER BULBS AS A STARTING POINT FOR WELL-BEING AND EXPERIENCE

Greenery contributes to health, connection, and enjoyment, especially when it invites people to become part of their surroundings. Flower bulbs play a special role in this: seasonal, accessible, and visible to everyone. With this in mind, JUB developed two well-being concepts that not only showcase greenery but also allow people to get involved and experience it.

COMMUNITY ENGAGEMENT | PLANTING TOGETHER

Planting flower bulbs as a catalyst for community engagement

Planting flower bulbs together makes greening understandable and accessible to everyone. Actively involving residents in the planting process fosters ownership, awareness, and appreciation for green spaces. What goes into the ground grows into support, pride, and long-term commitment to the surrounding environment.

IDEAL FOR

- **Residential neighbourhoods** – increasing engagement and connection
- **Schools and associations** – hands-on, educational and easy to implement
- **Care and community settings** – inclusive outdoor activity for all abilities
- **Projects with climate and biodiversity objectives** – accessible participation with lasting impact

THIS IS HOW “PLANTING TOGETHER” TAKES SHAPE

JUB Holland's participatory packaging makes active involvement in greening simple and practical, with a visible result that adds colour and biodiversity to public spaces for years to come.

JUB PICKING HAPPINESS | PICKING TOGETHER

Flowers to pick. Moments to share.

"JUB Picking Happiness" brings a new, soft layer to public green spaces: places where people can pick their own flowers. These floral ribbons bring colour and connection: neighbours connect, memories are shared, and residents, visitors, or patients experience the joy of giving something beautiful or taking it home with them.

IDEAL FOR

- **Residential neighbourhoods** – strengthens community spirit and active resident involvement
- **Care and remembrance settings** – a personal, uplifting gesture that brings people outdoors
- **Public parks and estates** – more experience, seasonal feeling and accessible greenery
- **Locations with biodiversity ambitions** – picking mixtures with bee- and butterfly-attracting species, designed for people and nature

THIS IS HOW “PICKING TOGETHER” TAKES SHAPE

- Colourful, ready-made picking mixtures with a long, successive flowering period
- Tailor-made picking garden with advice on variety selection, height structure, and colour themes
- Optional: information panels at the picking site

Mechanical planting

**EFFICIENT,
PRECISE AND
SCALABLE**

Mechanical planting is the most efficient way to install large quantities of flower bulbs in public green space. Using specially developed planting machines, between 10,000 and 25,000 bulbs per hour are placed quickly and accurately beneath turf, at the required density and with minimal disturbance to soil and surroundings.

Ideal for roadside verges, lawns, parks and estates, roundabouts and embankments.

THE BENEFITS AT A GLANCE

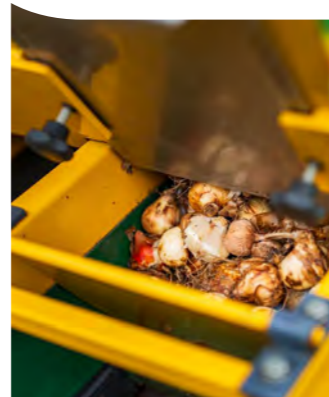

- Reduced labour costs through high planting speed
- Clean, uniform planting result
- Minimal disturbance to turf and soil
- Ideal for large areas and long stretches
- Consistent planting depth, variable planting density.
NOW ALSO: naturalistic planting pattern possible

Filling the machine with flower bulbs

Planting feet with rotating blades cut through the sod

Bulbs are conveyed via a conveyor belt to the planting feet

Sod is returned to its place by a roller and flattened

Fertilisation & mowing

Appropriate fertilisation and careful mowing management are essential for strong flowering and the sustainable return of flower bulbs year after year.

FERTILISATION

For long-flowering mixtures, apply an organic-mineral fertiliser (7-6-12 + 4MgO, 5 kg per 100 m²).

Autumn – during planting

When planting mechanically, fertiliser can be applied simultaneously, manually or via a dosing system integrated into the planting machine. This ensures targeted nutrition from the outset, delivered precisely where it is needed.

Spring – for additional support

In spring, an organic fertiliser may be applied, preferably at the emergence of flowers and just before rainfall, ensuring nutrients are readily available for a vigorous and even result – season after season. The organic component is converted by soil life into humus, improving soil structure and enhancing nutrient retention.

MOWING

For naturalising bulbs in grass, mowing can generally commence **six to eight weeks after flowering**. During this period, bulbs build sufficient energy reserves for strong performance in the following season.

Exception: Allium may be cut back immediately after flowering, as the foliage has already died back.

PRACTICAL SUPPORT

Further practical guidance on fertilisation, mowing management and planning can be found on our website. Scan the QR code or contact one of the JUB Specialists for tailored advice or full project support.

JUB Seasonal calendar

FROM INSPIRATION TO IMPLEMENTATION

PLAN YOUR BEST FLOWERING SEASON YET

JANUARY

Winter dormancy
Let the soil do the work.

For the agenda:

- Meet the JUB Team during the IPM in Essen, Germany

Now in bloom: Galanthus and Eranthis kick off the season

FEBRUARY

Just a little longer...
and then spring takes off.

Now in bloom: already plenty of food for bees through crocus and scilla, among others, beautifully combined with dwarf iris and the earliest daffodils

MARCH

Spring in full swing
The landscape is evolving. Every week looks different. Enjoy the unfolding combinations and subtle seasonal accents.

Don't forget:

- **Spring fertilisation:** apply a light organic feed
- Visit **Keukenhof (NL)** from early spring onwards

Now in bloom: the spring spectacle begins with muscari, daffodils, anemones, a wide range of naturalising bulbs and early tulips

JULY

Harvest season
During this period, the new bulb generation is lifted at our own nursery.

ORDER EARLY

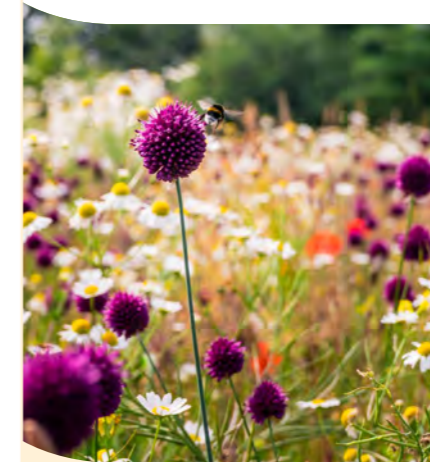

Orders can be placed from March onwards. Early ordering ensures availability and delivery from September.

Now in bloom: allium, ranunculus and summer-flowering bulbs

AUGUST

Site preparation
Prepare locations for planting

Now in bloom: allium, lilies and summer-flowering bulbs

SEPTEMBER

Start of delivery and planting season

- Bulbs can now be planted
- Mechanical planting of larger projects begins

Also consider:

- **Autumn fertilisation** (can be applied simultaneously during mechanical planting)

Now in bloom: the finale of summer bloomers and the first autumn-flowering varieties

APRIL

Get inspired
Go outdoors and enjoy the season!

- Identify areas that could benefit from added colour
- Explore the new JUB Autumn Catalogue
- Visit the **JUB Trial gardens, Keukenhof** and the **Flower parade of the Dutch Bulb district**.

Now in bloom: the height of spring, featuring daffodils, tulips, hyacinths and naturalising bulbs

MAY

Develop your plans

- Speak with JUB Specialists:
- Explore the range, suitable mixes and combinations together
 - Plan and design, and discover the benefits of mechanical planting

Now in bloom: camassia, fritillaria, allium, gladiolus and late tulips

JUNE

Decision making

- What do you want to see in your projects next spring?
- Will you choose manual or mechanical planting?

Please note:

Want another season of **spectacular flowering**? Allow foliage to die back naturally for **six to eight weeks after flowering**. Do not mow too early.

Now in bloom: the transition from spring to summer bloomers, including allium, ixia, lilies and triteleia

OCTOBER

Peak planting period
Our planting machines are active across Europe, establishing new landscape projects.

Also during this period:

- Discover the new **JUB Spring catalogue**, packed with summer varieties. Place your order early!

Now in bloom: colchicum, autumn cyclamen, autumn crocus and nerine. The berries of arum also provide seasonal colour.

NOVEMBER

Final planting window
Plan final planting days carefully around weather conditions and complete projects efficiently.

Mowing of **The Vibrant Verge**

DECEMBER

The earth whispers...
It may just still be possible. Plant as long as the ground is not frozen.

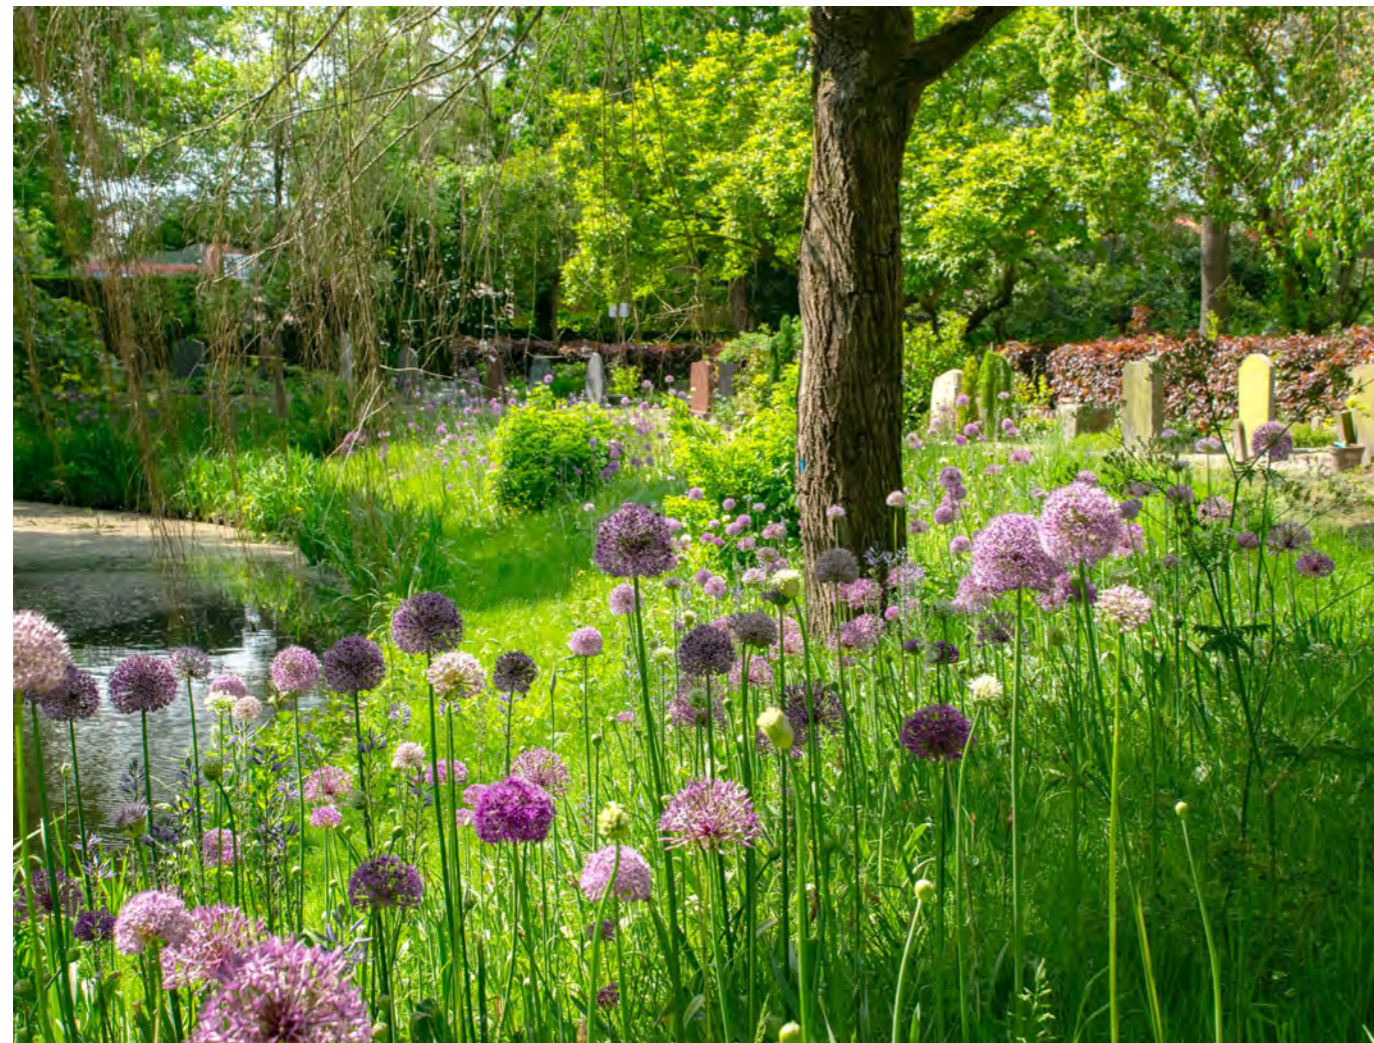

EVENTS

Trade shows, roadshows, study days, workshops and other events. View the full events calendar and meet our Landscape Team.

Symbols used in this catalogue

-  Flowering time in months
-  Scented flowers
-  Bulbs/mixtures attracting bees
-  Height in cm
-  Bulbs suitable for pots

 - Flower bulbs and biodiversity

From inspiration to implementation – all in one place:

JUBHOLLAND.COM

Mixtures for verges and grass areas

LOW-MAINTENANCE BULBS FOR VERGES AND LAWNS

These ready-made mixtures provide colour for months on end. JUB is pleased to advise whether your preferred mix is suitable for your project, taking into account factors such as mowing and weed management, light levels and soil type.

Custom mixtures can also be developed, from 30m² upwards – fully tailored to the site and aligned with the specific theme or character of your project.

*Mixture
Moerdijk*

NEW

BATH (3 PHASES)

A varied mix in three flowering colour waves. It opens with the lively blue-white-yellow of large-flowered crocuses and botanical daffodils, followed by a playful duet of muscari and botanical tulips, finishing with camassia, late daffodils and several large-flowered alliums.

feb-jun

10-70 cm

200/m²

jul >

30

JUB HOLLAND · Royal supplier of colour

BRIGHTON (3 PHASES)

From early to late spring, this mix shifts in colour and rhythm. Yellow daffodils lead, followed by white varieties and a finale of blue camassia. A strong, reliable composition that returns convincingly year after year.

mar-jun

15-70 cm

100/m²

-  10-25 cm
- 
-  300/m²
-  jul >

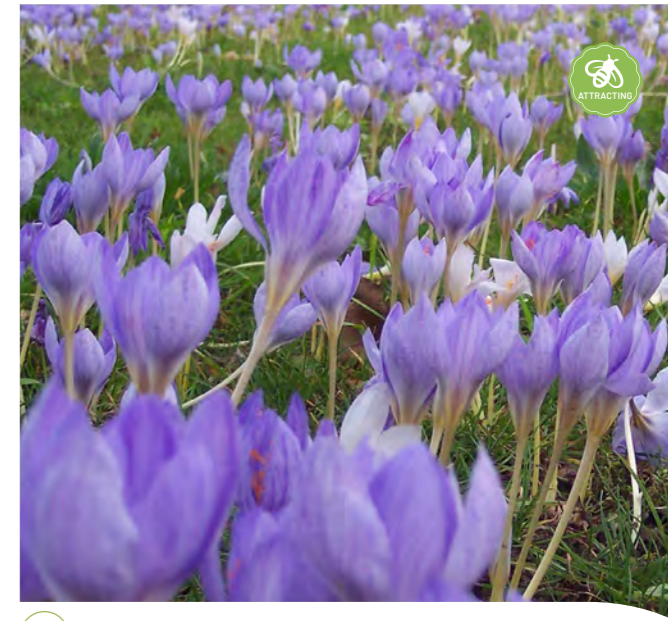

PHASE 1 feb ▶ mar ▶ apr ▶ may ▶ jun PHASE 2

MOERDIJK (2 PHASES)

A mix beginning with abundant crocuses, hyacinthoides, muscari, botanical tulips and daffodils, followed by alliums and camassia in the second phase.

-  feb-jun
-  10-80 cm
- 
-  200/m²
-  jul >

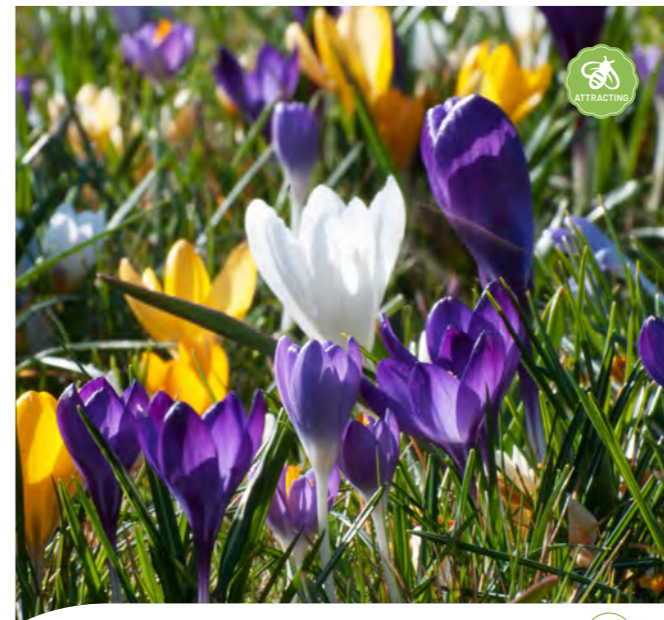

PHASE 1 feb ▶ mar oct PHASE 2

NIJMEGEN (2 PHASES)

A distinctive combination of spring- and autumn-flowering crocuses. One planting delivers two clear flowering moments each year.

-  feb-mar/oct
-  10-15 cm
- 
-  300/m²
-  may >

PHASE 1 feb ▶ mar ▶ apr ▶ may PHASE 2

OXFORD (2 PHASES)

A striking combination transitioning from mixed crocuses to botanical daffodils, muscari and vibrant red tulips.

-  feb-may
-  10-30 cm
- 
-  350/m²
-  jun >

PHASE 1 feb ▶ mar ▶ apr PHASE 2

TYNAARLO (2 PHASES)

A rich mix with an extended flowering period. Two successive phases unfold with crocuses, puschkinia and chionodoxa, followed by daffodils and botanical tulips.

		
feb-apr	10-25 cm	
		
300/m ²	jun >	

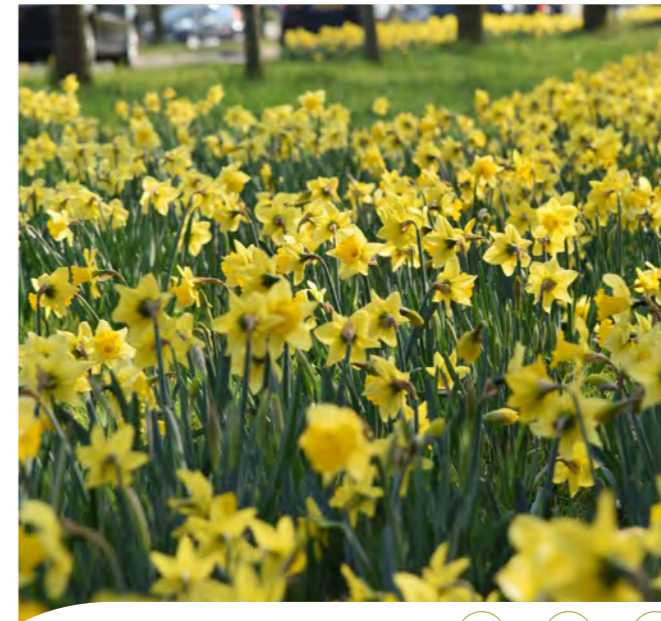

PHASE 1 feb ▶ mar ▶ apr PHASE 2

VEENENDAAL (2 PHASES)

A two-phase mix bringing early vitality. Purple species crocuses lead, followed by botanical tulips in vivid red with blue muscari – a dynamic display and valuable early nectar source.

		
feb-apr	10-25 cm	
		
350/m ²	jun >	

PHASE 1 feb ▶ mar ▶ apr ▶ may ▶ jun PHASE 2

VOLENDAM (2 PHASES)

Well suited to rough roadsides. Yellow daffodils lead, followed by alliums and camassia. The upright second phase naturally conceals fading foliage of the daffodils.

TAILORED NATURAL MIXTURES

For projects from 30 m², JUB can develop **tailored mixtures** aligned with site, application and design intent. Using practical expertise and smart design tools such as the FlowerDesigner App and Bloom Calendar fan, we visualise colour, sequence and impact in advance. This way you can immediately see what works – in colour, flowering time and effect.

▶ Discover what a bespoke approach can bring to your project. Contact your **JUB specialist**.

AMSTERDAM

A diverse mix of large-flowered daffodils in varied colours and forms, combining early and late types for a prolonged display.

		
feb-apr	30-50 cm	
		
100/m ²	jun >	

BRUSSEL

Highly colourful mix of large-flowered daffodils and tulips, ideal for entrance roads and central reservations.

		
feb-apr	25-50 cm	
		
130/m ²	jun >	

APELDOORN

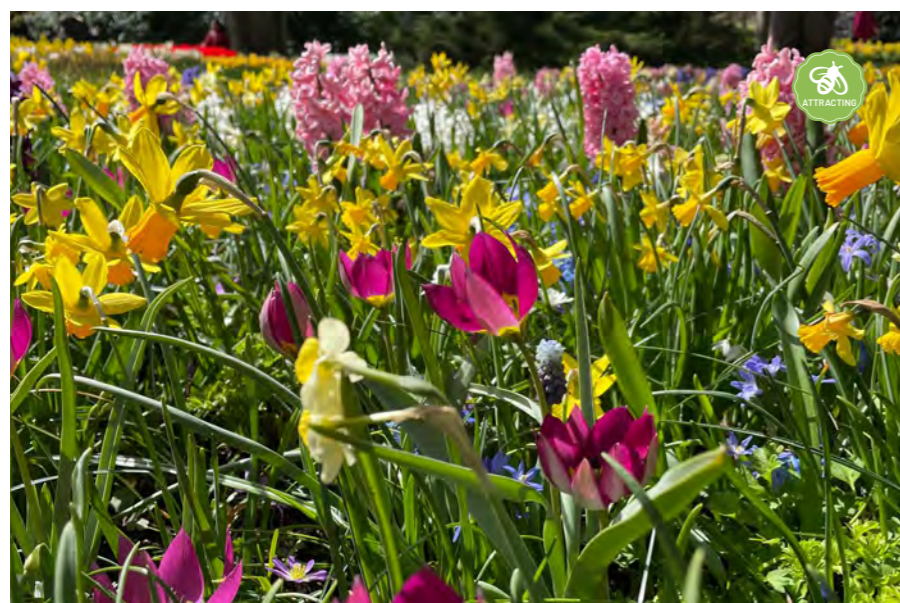

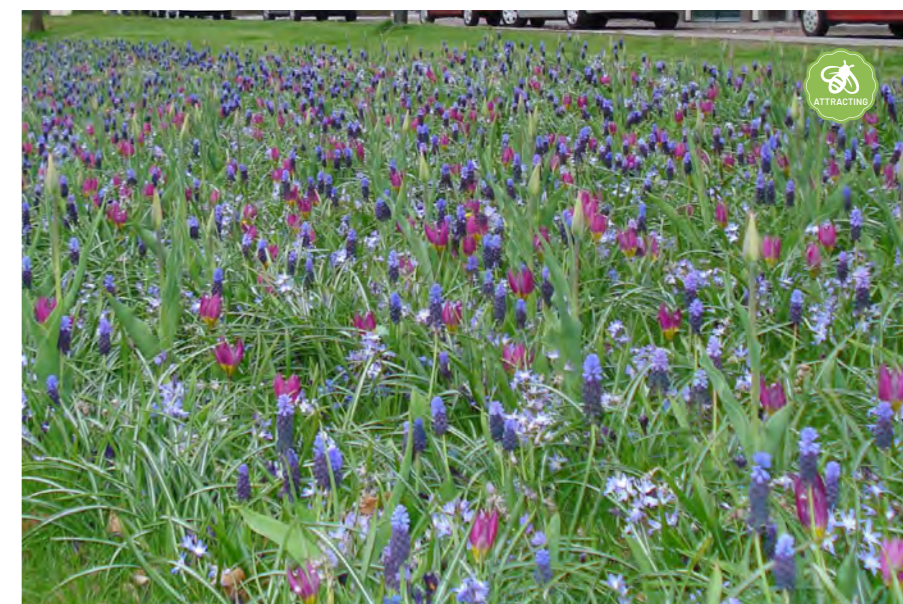

A colourful mix of botanical daffodils, enhanced with two contrasting tulip varieties.

		
feb-may	20-50 cm	
		
100/m ²	jun >	

EIKENHORST

This mixture of blues and lilacs, flowers early in Spring. It is a combination of various miscellaneous bulbs and specie tulips.

		
feb-apr	10-25 cm	
		
300/m ²	jun >	

BRUGGE

A fragrant mix of hyacinths, anemones, muscari, chionodoxa and botanical tulips and daffodils.

		
mar-apr	10-25 cm	
		
250/m ²	jun >	

EMMEN

Fragrant and cheerful mix of botanical daffodils and several hyacinth varieties.

		
mar-apr	20-25 cm	
		
100/m ²	jun >	

GOUDA

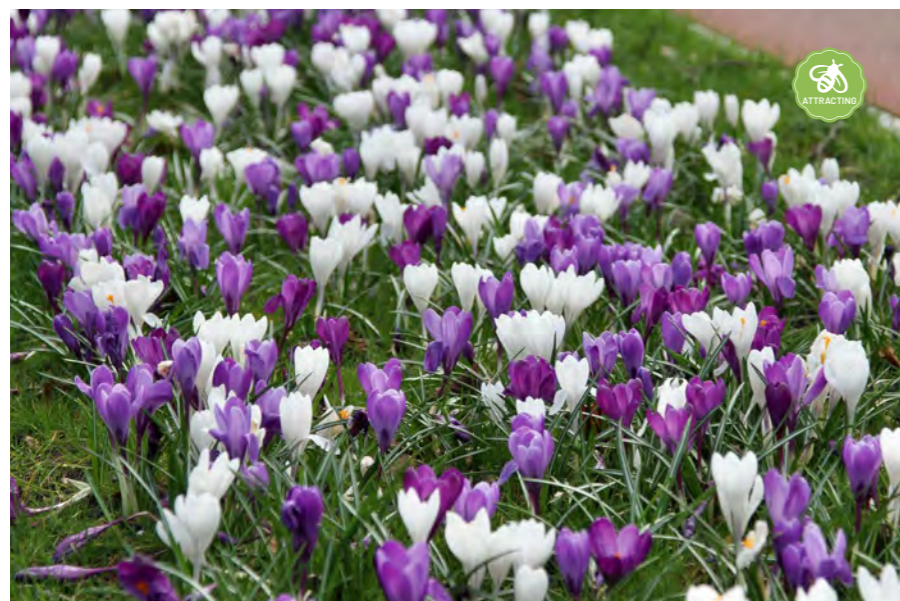

A balanced mix of scilla, muscari, botanical daffodils, tulips, and fritillaria. Natural in appearance and highly naturalising, with varieties that continue to develop naturally year after year.

 mar-may
 15-30 cm

 250/m²
 jul >

HELSINKI

Intense blue-flowering, fragrant hyacinths form the basis of this blend, combined with various botanical daffodils and delicate botanical tulips. Together, they create a powerful yet elegant spring display, with colour and fragrance in perfect balance.

 mar-may
 15-40 cm

 125/m²
 jun >

HAARLEM

A mixture of large-flowered crocuses with only shades of purple / blue, and white. Early blooming and very suitable for perennial flowering in lawns and other grass areas.

 feb-mar
 10-15 cm

 200/m²
 may >

LELYSTAD

A harmonious mix of botanical daffodils, tulips, muscari and chionodoxa.

 mar-may

 330/m²
 jun >

HAMBURG

Playful mix of botanical tulips and daffodils, muscari, species crocuses and ipheion. The addition of ipheion gives the mixture extra depth: a strong naturaliser that visibly enriches the image in the years that follow.

 feb-jun
 10-25 cm

 350/m²
 aug >

LISSE

This colourful mix of exclusively specie crocuses creates a vibrant display of colour very early in spring. It also serves as an important early food source for pollinators, precisely when they need it most.

 feb-mar
 10 cm

 250/m²
 may >

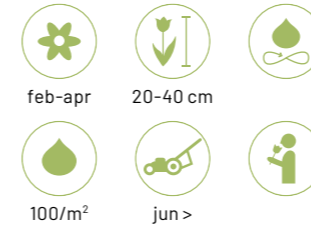

LIVERPOOL

Abundant spring mix of daffodils and striking red tulips.

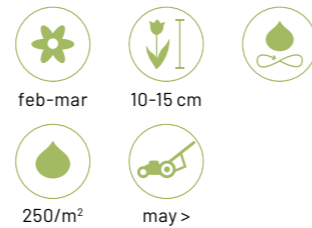

MIDDELBURG

Exclusively botanical daffodils with a beautiful variety of colours, shapes, and bloom times. Some varieties are also wonderfully fragrant.

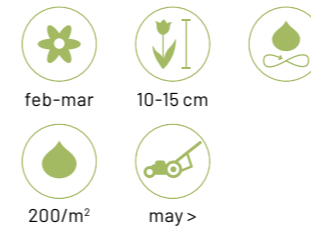

MAASTRICHT

Early-flowering, colourful mix of specie and large-flowered crocuses. Thanks to the combination of these two groups, this mix blooms just that little bit earlier.

NOORDWIJK

This early-flowering, colourful mix of large-flowered crocuses features yellow, white, blue / purple. A robust combination that blooms reliably year after year.

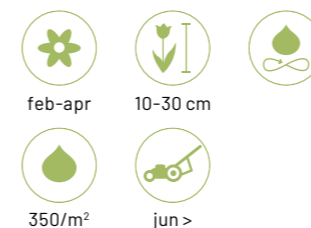

MANCHESTER

A late-spring blooming colour sensation for roadsides and lawns. A mixture of various alliums, camassias, and daffodils.

OAK PROCESSIONARY MOTH (OPM) MIX

A functional mixture that goes beyond just flowering. This mixture attracts insects early on, which play a natural role in suppressing the oak processionary moth. Application near oak trees supports a sustainable ecological balance and simultaneously strengthens biodiversity.

OEGSTGEEST

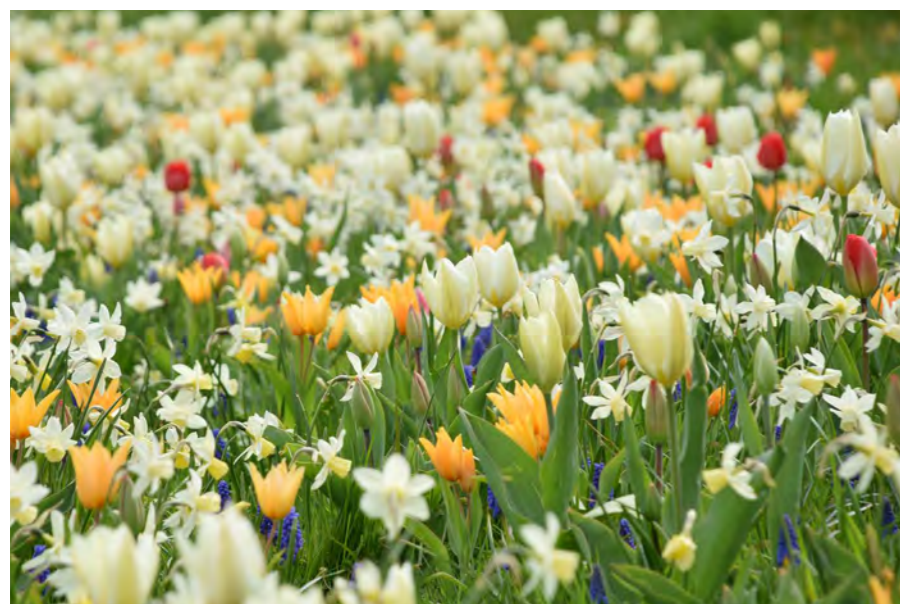

An early-flowering mixture with a rich variety. Botanical tulips, daffodils, and scillas form the base, refined with specialty bulbs like chionodoxa and fritillaria. Together, they create biodiversity and a natural, layered spring look.

		
feb-may	10-35 cm	
		
385/m ²	jul >	

SNEEK

A calm and natural-looking blend of blue-flowering camassias, various botanical daffodils, and leucojum. Ideally suited for moist conditions, such as wadis, where the mixture thrives and naturally enhances the landscape.

		
apr-jun	30-80 cm	
		
100/m ²	jul >	

OSLO

This beautiful mixture offers a unique colour combination with, among others, early flowering botanical tulips, botanical daffodils and muscari.

		
apr-may	15-60 cm	
		
265/m ²	jul >	

VENLO

Create a vibrant colour sensation in roadsides and lawns with this mix of large-flowered alliums. Purple and white flowers create a striking display for weeks in late spring, followed by decorative seed pods that remain visible for a long time. This mixture also attracts bees and butterflies.

		
may-jun	80-90 cm	
		
60/m ²	jul >	

ROTTERDAM

A beautiful mixture of exclusively large-flowered yellow daffodils combining early low-growing and taller later varieties for extended flowering from February to late April.

		
feb-apr	30-50 cm	
		
100/m ²	jun >	

ZWOLLE

This mixture consists entirely of white flowers: white crocuses, white chionodoxa, white scillas, white daffodils, and two varieties of white tulips. Together, they create a fresh and refined look that elegantly brings colour to spring.

		
feb-apr	10-50 cm	
		
220/m ²	jun >	

Eye-catchers

BULBS THAT DELIVER A WOW EFFECT TO EVERY SPOT

Our Eye-Catchers are designed for places where you want to hold attention just a little bit longer. A jubilee, a landmark location, an entrance that deserves impact – these mixes create instant atmosphere. Carefully composed in colour and height, with flowering timed to let the setting speak at exactly the right moment.

A Mysterious Dutch Still Life at Keukenhof

50

JUB HOLLAND · Royal supplier of colour

Eye-catchers Keukenhof

*From Sketch to Spectacle
Carien van Boxtel and the JUB team*

As **one of the earliest exhibitors**, JUB Holland has been closely connected with Keukenhof in the Netherlands – the world’s finest spring garden – for decades. Each spring, Keukenhof opens for eight weeks as an **international showcase for the bulb sector**: a setting where innovation, quality and design come together, inspiring millions of visitors from across the globe.

Since 2019, we have shaped a distinctive and recognisable design signature together with garden and landscape designer Carien van Boxtel. Her designs read like paintings – layered, surprising and carefully composed in time, colour and rhythm. The combinations are planted by the Keukenhof garden team in three precisely structured layers, a craftsmanship

that reveals itself in every flowering phase. These designs for Keukenhof have been translated into a practical collection within our Eye-Catcher mixtures: exclusive designs developed for locations that are meant to stand out. From show border to landmark green projects – with the same impact and refinement, scalable for wider application.

The exclusive ingredients in these blends require strict planning. Contact us ahead of time to ensure availability.

A MYSTERIOUS STILL LIFE 2025

keukenhof
official partner 2026

A theatrical, layered spring scene full of depth and contrast: a diverse mix of tulips and naturalising bulbs that, with deep red and pink shades like subtle seductions, evokes the poetic beauty of 17th-century flower still lifes.

mar-may

15-90 cm

110/m²

INDIGO 2024

keukenhof
official partner 2026

Inspired by the many shades of indigo, a diverse mixture was created. The naturalising bulbs provide blue tones, while the mauve and lilac shades of tulips and the moon yellow shades of daffodils provide depth and colour contrast.

feb-may

25-70 cm

110/m²

WILD GARDEN 2021

Wild Garden is an ode to William A. Robinson, (1838 - 1935) the Irish gardener who was at the origin of the concept of the Cottage Garden. He started planting mixed flower borders in a more casual way. He was a great advocate of the use of naturalising bulbs.

keukenhof
official partner 2026

apr-may 25-70 cm 110/m²

HOT & COLD 2020

Warm shades of red, brown, and orange are combined with cool mauve, lilac, and lavender-pink colours. Flowering begins in late March with tulips and daffodils and continues into April, supplemented by fritillaria and smaller spring bloomers.

keukenhof
official partner 2026

mar-may 30-90 cm 110/m²

VELVET 2023

Carpets, woven in repeating patterns based on floral motifs and rich, colour schemes, formed the inspiration. Saturated colours of burgundy red, black, purple, bronze, ocher, warm orange and brown were chosen, with contrasting accents of warm yellow and cream.

keukenhof
official partner 2026

mar-may 25-100 cm 110/m²

SILK 2022

A design based on the beautiful colours of an embroidered silk dress of Queen Maxima. Soft antique faded colours such as apricot, lilac, soft pink and white tones and regal purple, designed by Jan Taminiau. A wonderful mixture.

keukenhof
official partner 2026

SPRING IN THE DUTCH BULB DISTRICT

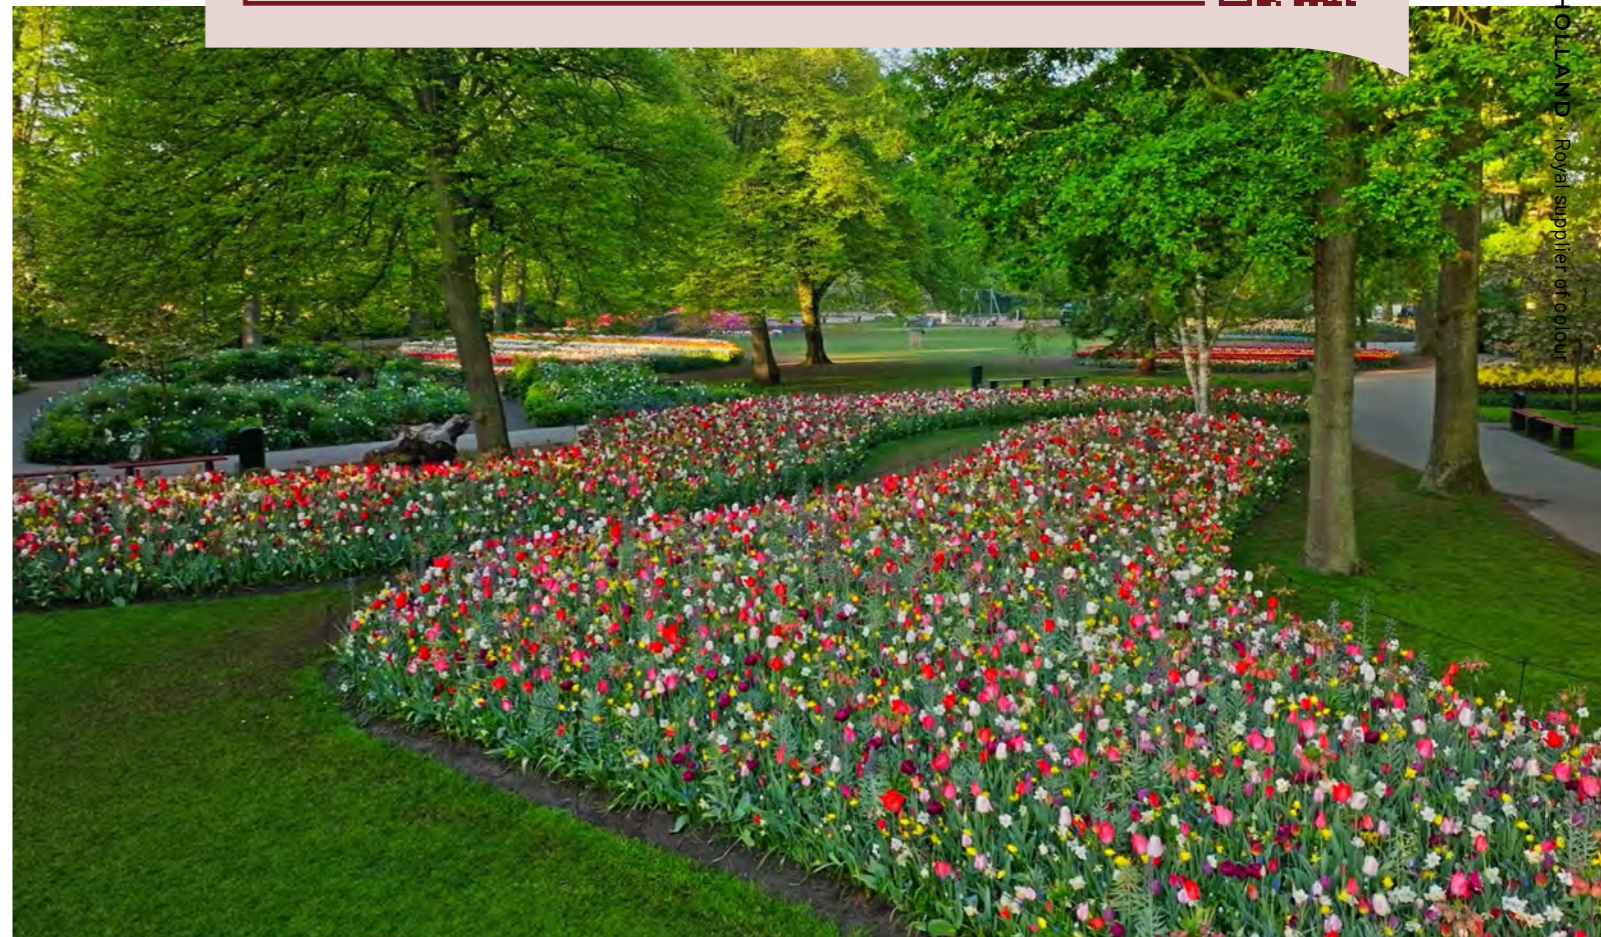

It all comes together

Keukenhof is open each spring from mid-March to mid-May. For current opening times, tickets and visitor information, please visit: www.keukenhof.nl/en.

The JUB border (exhibitor number 14) can be found in a prominent location within the park – close to the iconic windmill, just across the bridge. An ideal spot to experience the design in its full layering and flowering sequence.

Keukenhof is located just around the corner from JUB Holland in Noordwijkerhout. A visit to the park combines perfectly with a tour of our company and trial fields in bloom, where you can see how our mixtures are composed and assessed in practice. In spring, JUB also hosts the build-up days of the Flower Parade of the Bulb District – a unique behind-the-scenes glimpse of a regional icon and a true Dutch Intangible Cultural Heritage event, where craftsmanship, planning and creativity come together.

Would you like to make the most of spring in the Bulb District? Scan the QR code to explore the possibilities or contact one of our JUB Specialists (see page 143).

A Mysterious Dutch Still Life at Keukenhof

NUDE & WHITE 2019

One of the two JUB borders designed by Carien in 2019 was Nude & White: A fresh white-green border with salmon and nude-coloured accents.

NUDE & DARK 2019

The other JUB border designed by Carien in 2019 was Nude & Dark: A dramatic dark border with salmon and black/purple accents.

ALL COLOURS

The name is clear, a cheerful and festive mixture of tulips in all colours.

apr-may

45-55 cm

100/m²

BRIGHT SIDE

A classic. A favourite mixture in our range for many years. A simple but exuberant combination of tulips and narcissi in yellow, orange and white.

apr-may

35-40 cm

100/m²

AMORE

Pink represents love. A striking combination of three beautiful tulip varieties. Beautiful in a border between early emerging perennials.

apr-may

35-40 cm

100/m²

CHEER YOU UP

Tricoloured combination of impressive Darwin hybrid tulips. Red, yellow and purple. Striking in many ways.

apr-may

55-60 cm

100/m²

ARCTIC FRESH

White and cream yellow are the basic colours of this fresh combination. Subtle daffodils, leucojum, muscari and large creamy-white tulips.

mar-jun

30-55 cm

80/m²

CHIC

Stylish and colourful: an elegant mix of lily-flowered tulips in red, white, and yellow. A fresh spring classic with a modern look.

apr-may

40-45 cm

100/m²

DAILY NEWS

A classic in our Eye-Catcher range. A daring combination. Striking in large flower beds or perennial borders.

apr-may 45-50 cm 100/m²

DAYLIGHT TO DUSK

Illustrious late-flowering combination of white and black tulips. A big contrast but immediately a striking appearance.

apr-may 50-60 cm 100/m²

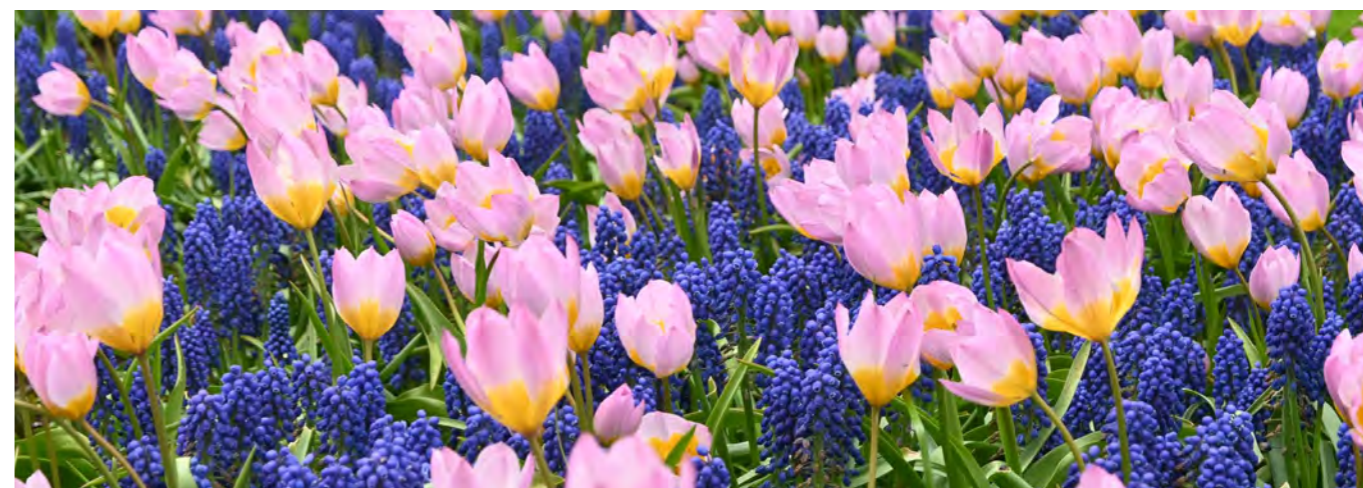

DANCING TULIPS

Simple but so beautiful. Various Triumph tulips in white and pink with blue grape hyacinths as a base.

apr-may 15-55 cm 150/m²

DELICATE CONTRASTS

An romantic combination of blue grape hyacinths with light pink botanical tulips. A combination that can be applied anywhere.

apr-may 15-20 cm 100/m²

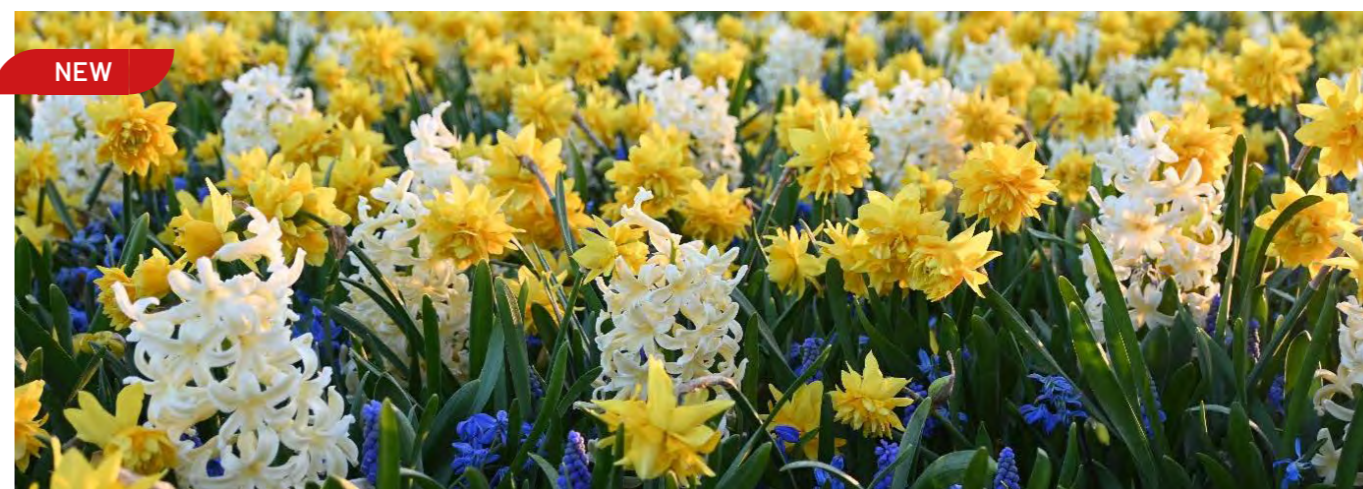

DARING DISPLAY

Warm red and fresh white tulips, subtle white daffodils with, as extra special feature, the impressive white-green crown imperials. A bold combination.

apr-may 25-80 cm 100/m²

EASY BREEZE

Airy and spring-fresh: soft yellow hyacinths, double botanical daffodils, and blue grape hyacinths bring a gentle breeze of colour and fragrance.

mar-apr 15-25 cm 150/m²

ENERGY

The yellow and orange narcissi play an important role in this combination and form the basis of a captivating mix of yellow, orange and pink.

apr-may 30-80 cm 100/m²

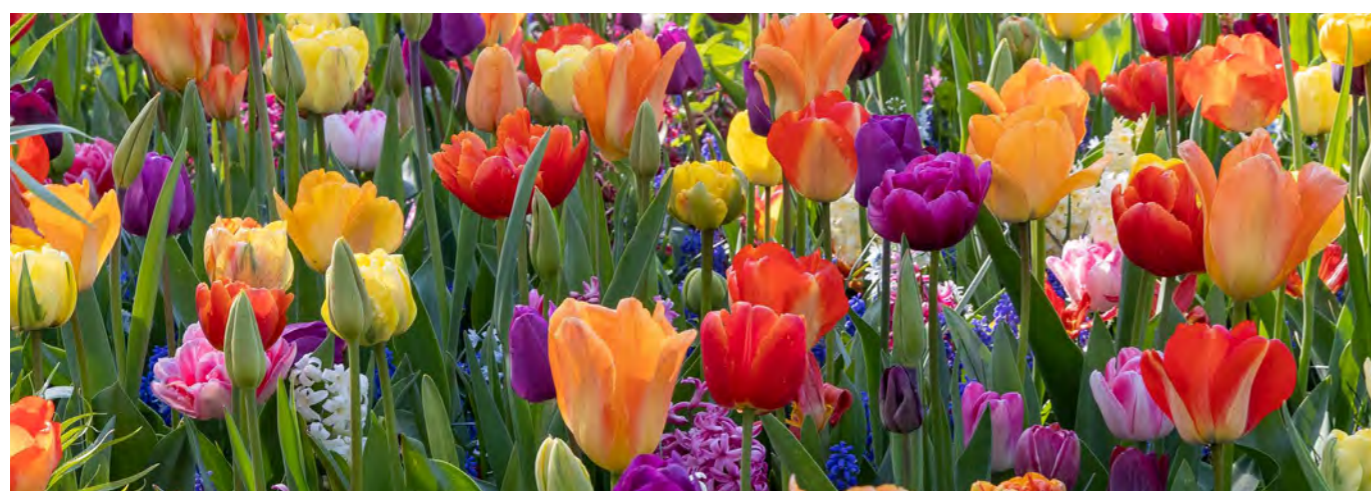

FIREWORKS

Sparkling and flashy. A combination of orange lily-flowering tulips and two types of large-flowered yellow daffodils.

apr-may 45-50 cm 100/m²

FESTIVAL OF COLOURS

The name says it all. A feast of colour. Many types of tulips and various hyacinths for scent and colour.

apr-may 25-55 cm 100/m²

FLAMING BEAUTY MIX

A mix of exclusively bicoloured tulips. Special and striking. Tulips that resemble the 'historical' Rembrandt tulips.

apr-may 35-45 cm 100/m²

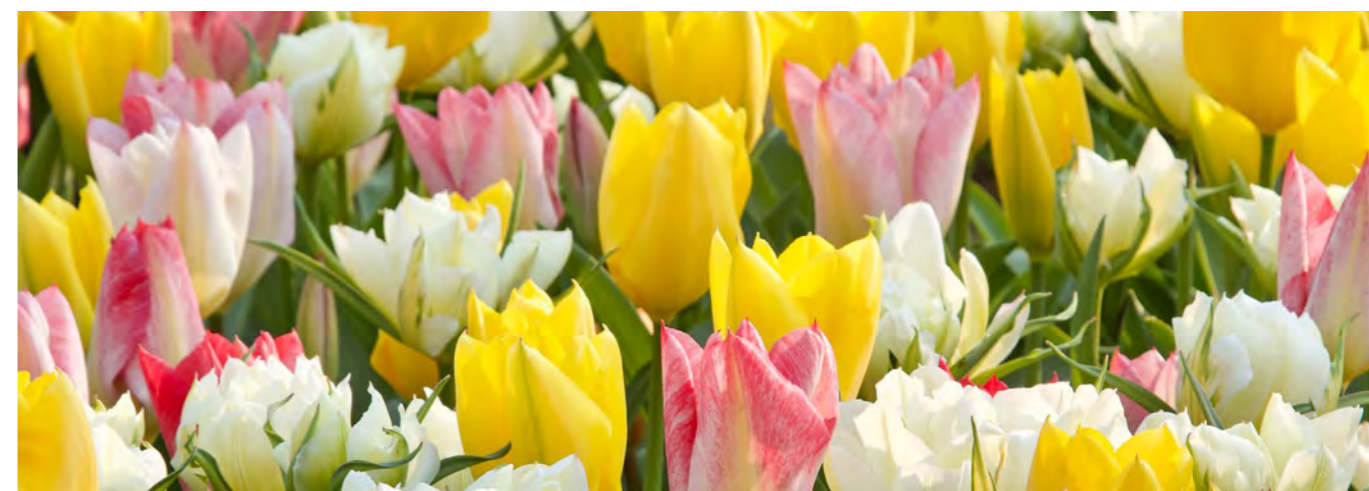

FIESTA

Stately combination of several late tulips. Impressive. A (late) spring party!

may 55-60 cm 100/m²

FOSTERIANA BEAUTIES

Fosteriana, a group of tulips, fairly early flowering and large flowers. This combination consists of three beautiful members of the group.

mar-apr 35-40 cm 100/m²

FOXTROT PARTY

A combination of three double early tulips with orange, salmon, pink and red colours. A special and daring mix.

apr-may 30-35 cm 100/m²

FRESH SPRING

A combination of different types of bulbs with various shapes and special colours. A standout feature is the addition of the purple crown imperials.

apr-may 15-90 cm 110/m²

FOXY FOXES

A combination of two double early tulips with soft yellow and pink colours. A distinctive colour statement.

apr-may 35-40 cm 100/m²

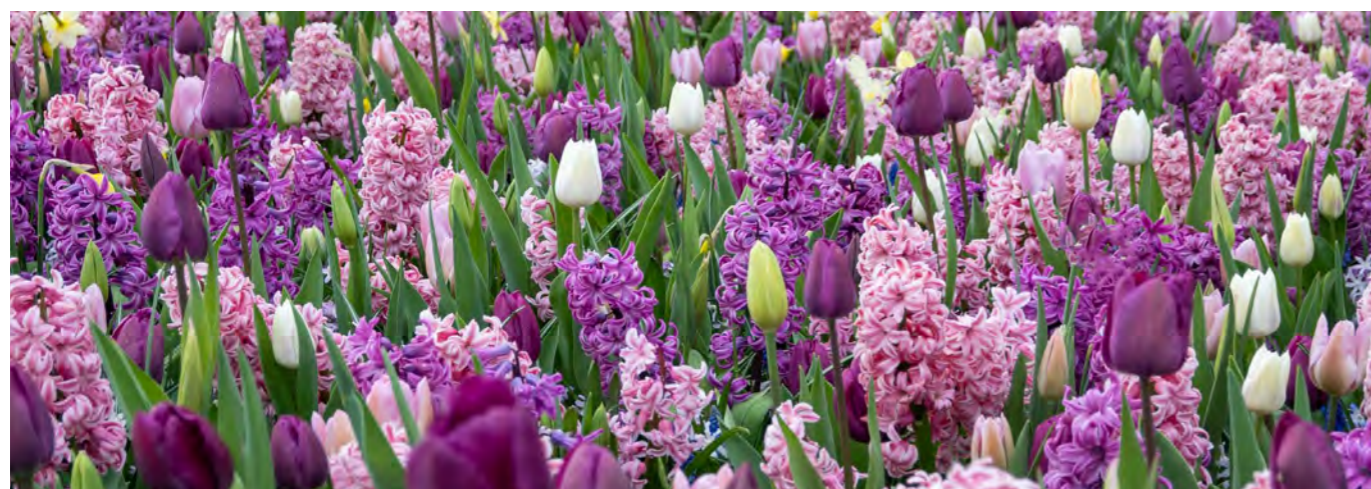

HARMONY OF PURPLES

Another beautiful combination with purple as the main colour. Three types of Triumph tulips that match each other perfectly.

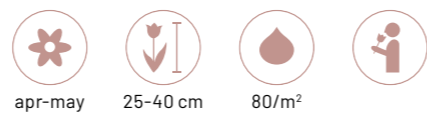

apr-may 40-50 cm 100/m²

FRAGRANT SURPRISE

Purple and pink are the basic colours of this fragrant combination, with the addition of a few white accents of tulips and daffodils.

apr-may 25-40 cm 80/m²

HAVE PLEASANT DREAMS

A winner with scent and colour. Several hyacinth varieties, beautiful salmon coloured greigii tulips and subtle bicoloured blue grape hyacinths.

mar-apr 35-40 cm 100/m²

HEAVENLY SOFT

So many beautiful species together in a striking combination of pink, white, orange and salmon. A rich mix with a peaceful appearance.

mar-may 35-45 cm 100/m²

IRRESISTIBLE FRAGRANCE

The scent of spring awaits you. Beautiful combination of many hyacinth varieties. Indispensable in spring borders and flower beds.

mar-apr 25-35 cm 50/m²

HIGH SPIRITS

Tall bloomers in soft pastels, bright yellow and deep purple create a sparkling display brimming with spring energy.

apr-may 55-75 cm 100/m²

LEMON TWIST

Fresh with a striking twist: yellow crown imperials paired with purple-and-white flamed tulips and elegant yellow lily-flowered tulips. A bold spring statement.

apr-may 40-90 cm 100/m²

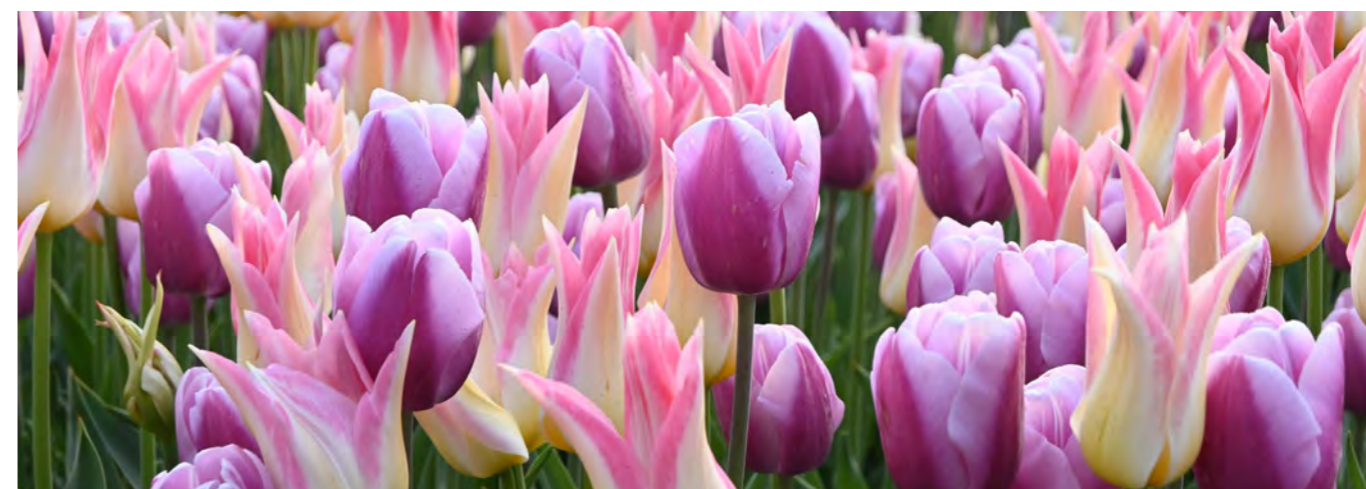

IMPERIAL FRIENDS

A favourite among our Eye-catchers. A cheerful mixture of orange, yellow and white. Stately large-flowered fosteriana tulips.

mar-apr 35-40 cm 100/m²

LUXURY

Combination of two beautiful bicoloured tulip varieties in lilac, pink and white tones.

apr-may 40-45 cm 100/m²

MAGNIFICENT DUO

Classic blend of orange, yellow and two-tone blue. A rich combination with impressive colours.

apr-may

15-30 cm

150/m²

MOONDANCE

The 'black' tulip in this mixture makes it a colourful combination with a twist.

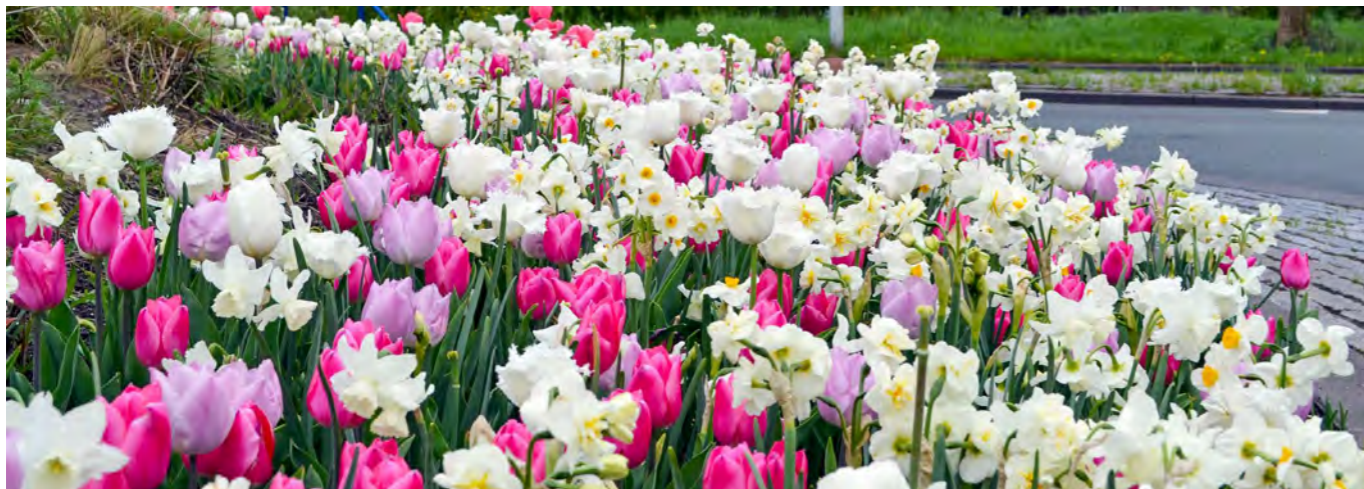

apr-may

35-45 cm

100/m²

MASSIVE SPRING

A stunning mix of white, pink, and lilac. This blend of tulips and daffodils creates a striking effect wherever it is used.

apr-may

40-55 cm

100/m²

ORANGE GLOW

Orange predominates in this combination. From bright to pastel. Striking combination in the spring border.

apr-may

50-90 cm

100/m²

MONDRIAAN MIX

A bold nod to the master: red and yellow tulips with blue anemones create a playful and artistic splash of colour in spring.

apr-may

25-50 cm

130/m²

PAINTERS CHOICE

One of our most special Eye-Catchers. Flowers that could come straight off a 17th century painting. Bicoloured tulips and, among others, crown imperials.

apr-may

35-80 cm

75/m²

PALETTE OF SPRING

A striking yet subdued combination of lily-flowering tulips with richly flowering narcissi and bicoloured grape hyacinths in the base.

apr-may

15-55 cm

150/m²

PINK DREAMS

Soft pastel shades from white to dark pink. A combination of hyacinths and tulips. A fragrant mixture.

apr-may

25-60 cm

100/m²

PEACEFUL PASTELS

A gentle pastel mix of various double tulips. A subdued mix for an impressive display in the spring border.

apr-may

40-55 cm

100/m²

PINK REVELATION

The fragrant white and pink hyacinths form the basis of this mainly pink and red bulb mixture.

apr-may

25-55 cm

70/m²

PINK AND A TOUCH OF WHITE

A favourite Eye-catcher. Various white and pink tulips. An elegant combination. Medium and high tulips, single and double flowers.

apr-may

25-55 cm

100/m²

PROMISE OF SPRING

A fresh early-flowering combination. Short kaufmanniana tulips mingled with purple/white striped and purple and lilac large-flowered crocuses.

feb-apr

10-20 cm

200/m²

PURE & PASTEL

Pink, white and lilac. Pastel colours that glisten in the sun. As additional decorative elements, this combination also contains bee-attracting camassias.

apr-may

45-80 cm

100/m²

PURPLISH

A combination with the focus on purple, but with pink and white accents. Pink and purple hyacinths provide fragrance and bloom in the base of this mixture.

apr-may

25-55 cm

80/m²

PURPLE BLING

A combination of not too tall single early 'Prince' tulips. Striking and compact.

apr

35-40 cm

100/m²

QUEENS

Special colour combination of two types of strong Triumph tulips. Dark reddish and striking pink.

apr-may

45-50 cm

100/m²

PURPLE PUNCH

Special combination of intense purple, lilac and lilac-pink colours with a touch of white for contrast.

apr-may

40-50 cm

100/m²

QUIET CONTRASTS

A combination with style. Various Triumph tulips in lilac, purple and salmon colours, combined with cheerful white and orange tazetta narcissi.

apr-may

40-65 cm

100/m²

REASON TO BE CHEERFUL

High-contrast red and white. Two very short, mid-early tulips with cup-shaped flowers.

apr-may

25-35 cm

100/m²

SUN FEVER

Vibrant colour combination of three large-flowered Darwin hybrid tulips. For sunny locations that deserve full attention.

apr-may

50-55 cm

100/m²

ROYAL PRINCES

A tricolour mix of single early tulips. The same shape but different colours. Creates a fresh spring look.

mar-apr

30-35 cm

100/m²

SUNSET

A combination that is not only beautiful at the end of the day. It makes you happy. Striking orange Triumph tulips with lightly scented narcissi.

apr-may

40-55 cm

100/m²

SPRING PEONIES

Double late tulips that resemble peonies. Pastel colours make this combination applicable everywhere. Plant large numbers for the best results.

apr-may

45-50 cm

100/m²

SUNSET ROSÉ

Warm hues softly blend into each other: red, pink, and bronze-gold tulips capture the atmosphere of a sultry sunset in full bloom.

apr-may

50-55 cm

100/m²

SUNSHINE

Combination with the yellow crown imperial. High-contrast tulip varieties that reinforce each other with playful and fragrant narcissi.

apr-may 35-85 cm 100/m²

VICTORY ALKMAAR

An early-flowering, high-contrast combination. White crocuses with bright red crocus-like short tulips. A nice fresh start to the spring season.

mar-apr 15-25 cm 200/m²

SWEET DREAMS

An impressive combination of pink, white and green. A soothing pastel mix that fits beautifully in borders or public gardens.

apr-may 25-55 cm 100/m²

WINING AND DINING

The colours of this combination give the impression of many types of wine. Red, rosé and sparkling white. A mixture that will fit perfectly in a restaurant garden.

apr-may 30-60 cm 100/m²

VIBRANT SUNSET

A combination of four double tulips. A striking mix for a spot in a planting bed that will receive plenty of attention. A floral sunset.

apr-may 30-40 cm 100/m²

YELLOW FRESH AND A TOUCH OF PINK

A true mood-setter. Various shades of yellow with pinkish-red accents. A blend bursting with colour and fragrance.

mar-apr 25-35 cm 80/m²

Naturalising bulbs

A TIMELESS COLLECTION FOR RESILIENT LANDSCAPES

*Naturalising bulbs in
Heemparken Amstelveen,
the Netherlands*

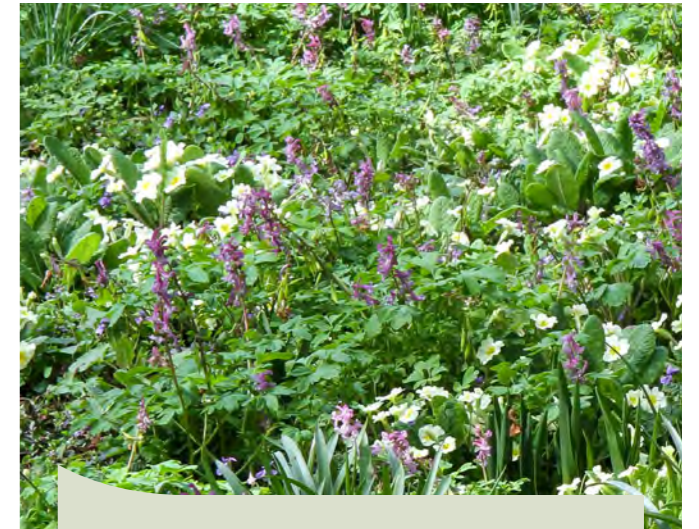

Naturalising bulbs have formed the quiet understorey of woodland planting, parks and country estates for generations. They flower early, retreat in good time and strengthen the landscape without dominating it.

JUB Holland's naturalising bulb range is broad and specialised, carefully composed for natural planting schemes from sun to shade. In collaboration with the Amstelveen botanical gardens – where ecology, management and practice come together – a unique collection has been developed to create green spaces that evolve into robust, self-sustaining natural systems.

IDEAL FOR:

- Woodland planting and shaded margins
- Ecological zones and parkland
- Historic gardens and estates
- Naturalistic urban green space under extensive management

A VALUABLE ADDITION TO YOUR PLANTING PLAN

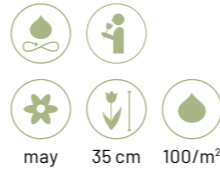

- **Naturalising and self-sustaining**
Gradually spreading through underground propagation and/or self-seeding.
- **Early flowering and ecologically functional**
Supporting biodiversity by providing food for early pollinators during a vulnerable period.
- **Brightens (semi) shady spots**
Developed for woodland edges, parkland zones and sheltered sites.
- **Long-term presence**
Returning year after year without leaving persistent above-ground bulk.
- **Supporting natural succession**
Fading after flowering and allowing space for herbaceous layers and groundcover
- **Naturally combinable**
An integral part of layered, species-rich and extensively managed vegetation.

*Naturalising bulbs are durable
building blocks for landscapes defined
by rhythm, calm and resilience.*

ALLIUM URSINUM - WILD GARLIC

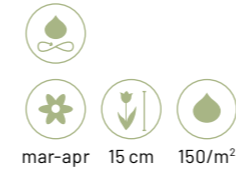

Early white spring flowering with strong naturalising ability. Ideal for (partial) shade in parks and woodland edges. Gives a pronounced garlic scent during flowering.

ANEMONE RANUNCULOIDES - YELLOW WOOD ANEMONE

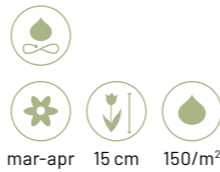

A rarer yellow counterpart to Anemone nemorosa. It provides colour variation in a variety of settings and enhances the character of historic and park-like locations.

ANEMONE BLANDA - EASTERN ANEMONE

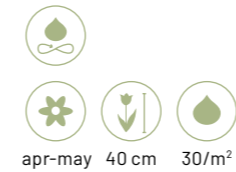

Low-growing spring flowers in fresh blue tones. Suitable for partial shade and light sun. Quickly forms dense carpets and combines well with early bulbs.

ARUM ITALICUM - ITALIAN ARUM

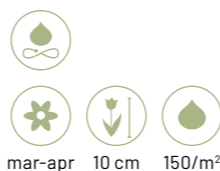

Strikingly decorative foliage in autumn and winter and a torch full of bright orange berries. Suitable for sheltered, (semi-) shady spots.

ANEMONE NEMOROSA - WOOD ANEMONE

A classic woodland anemone with a strong, natural look. Excellent for naturalising in (partial) shade. This mood-setter creates a white carpet.

CHIONODOXA LUCILIAE - GLORY OF THE SNOW

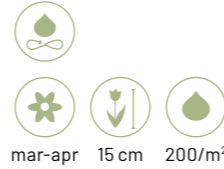

Very early flowering with clear blue tones. Ideal for naturalising in sun and partial shade.

CHIONODOXA SARDENSIS - TURKISH GLORY OF THE SNOW

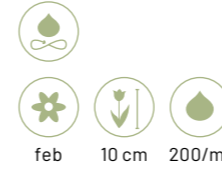

Deeper blue and more compact than luciliae. Robust, fast-spreading and well suited to extensively managed green strips.

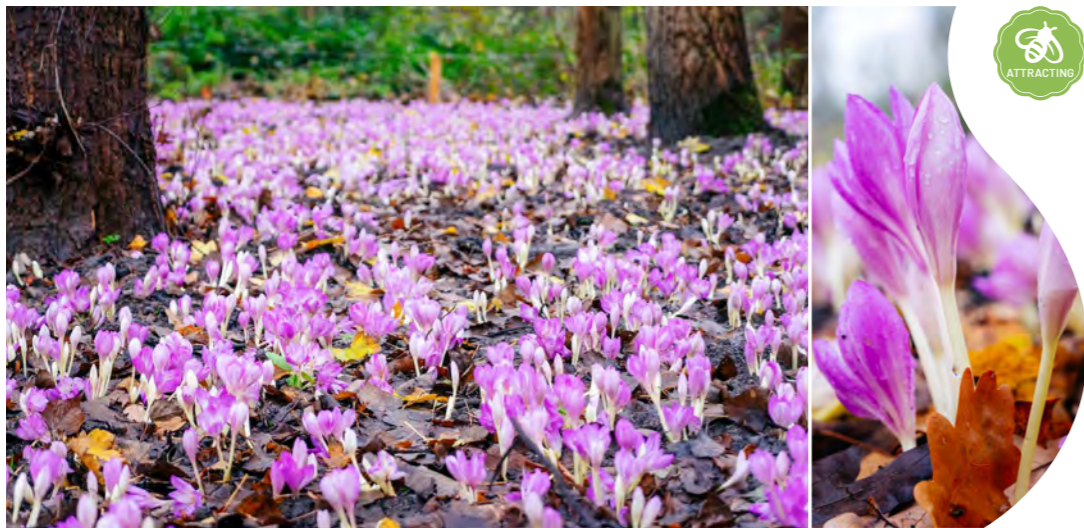

CROCUS TOMMASINIANUS - EARLY CROCUS

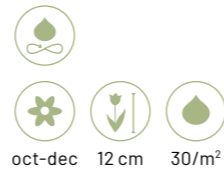

One of the strongest naturalising crocuses. A true bee magnet. Self-seeding and colouring verges and lawns purple in sun and partial shade.

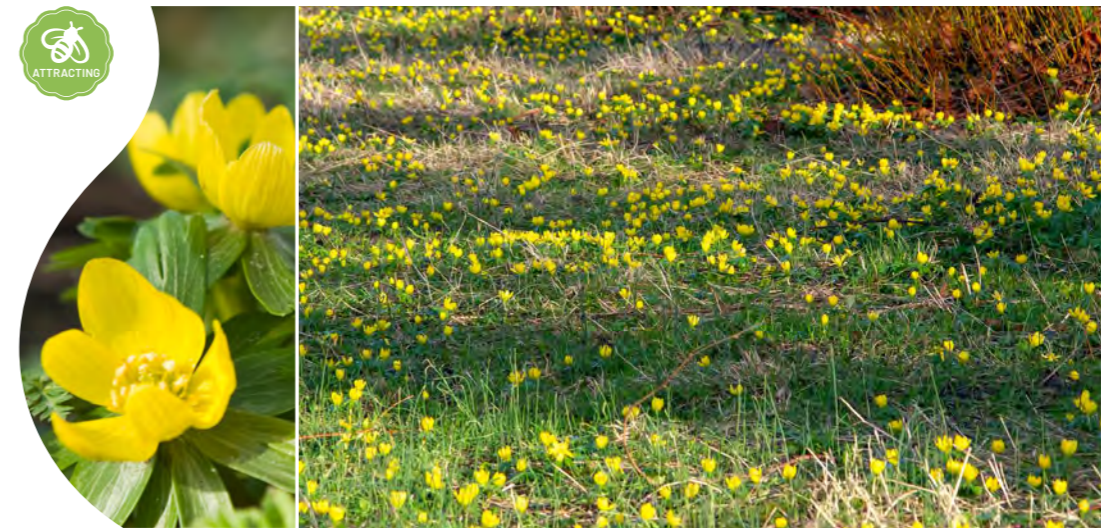

COLCHICUM AUTUMNALE - NAKED LADY

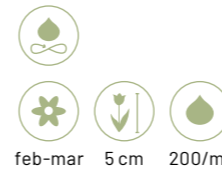

Just when the season seems finished, this autumn-flowering bulb surprises with colour and elegance. Suitable for park grass and open spaces in sun and partial shade. Foliage appears in spring.

ERANTHIS CILICICA - WINTER ACONITE

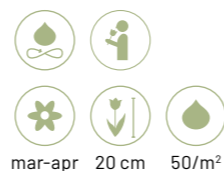

Very early winter-flowering bulb with bright yellow flowers. Suitable beneath shrubs and trees; valuable as an early nectar source.

CORYDALIS CAVA - HOLLOW ROOT

Early pastel flowering with fine foliage. Ideal for woodland gardens and shaded park edges. Fragrant and disappearing neatly after flowering.

ERYTHRONIUM PAGODA - DOG'S TOOTH VIOLET

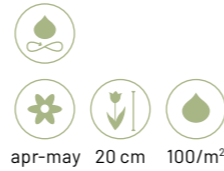

Elegant spring flower with ornamental foliage. Thrives in partial shade, adding refinement to naturalistic planting in parks and estates.

FRITILLARIA MELEAGRIS - SNAKE'S HEAD FRITILLARY

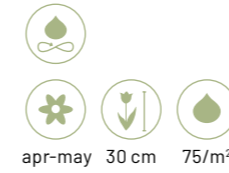

Iconic chequered species. Suited to damp grassland and natural zones in (partial) shade; adds character and biodiversity value.

LEUCOJUM AESTIVUM - SUMMER SNOWFLAKE

Robust summer snowflake with late spring flowering. Suitable for damp zones and park meadows; long-flowering with a woodland character.

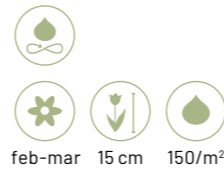

GALANTHUS NIVALIS - SINGLE SNOWDROPS

The classic snowdrop for natural plantings in (partial) shade, where it self-seeds. Early, resilient and returning reliably year after year.

CITES-restricted

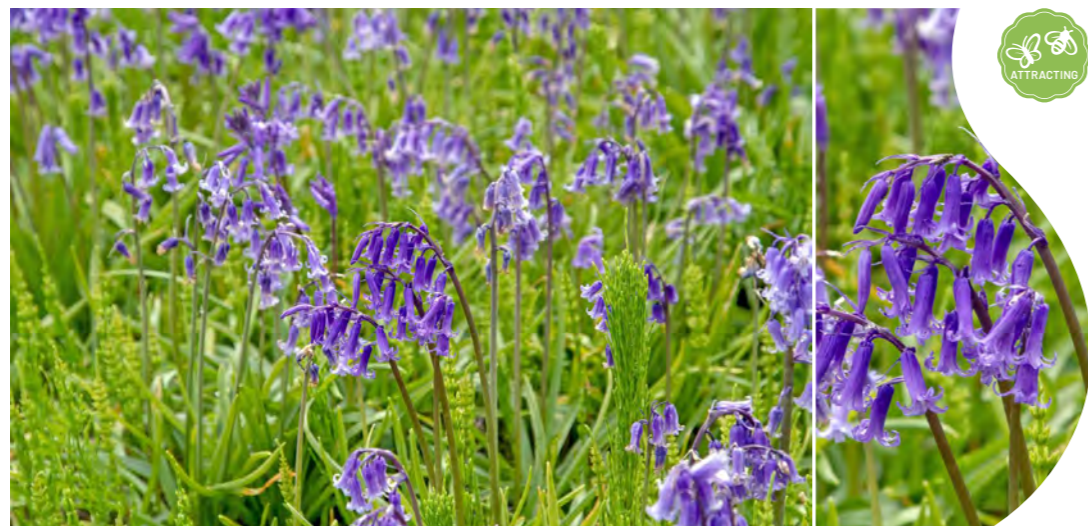

LEUCOJUM VERNUM - SPRING SNOWFLAKE

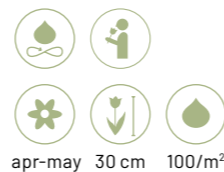

Early flowering with fresh white blooms. A natural successor to snowdrops. Suitable for partial shade and waterside planting; reliable and low-maintenance.

HYACINTHOIDES NON-SCRIPTA - ENGLISH BLUEBELL

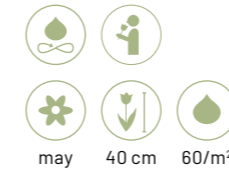

Ideal for large-scale naturalising in semi-shaded landscapes, forming fairy-tale blue carpets over time.

NARCISSUS POETICUS (VAR. RECURVUS) - POET'S NARCISSUS

Small-flowered, late-flowering daffodil. Suitable for extensive grassland and naturalising in sun and partial shade; subtle yet distinctive.

ORNITHOGALUM NUTANS - DROOPING STAR OF BETHLEHEM

White flowers with green markings. Suitable for sun and partial shade; strong naturaliser in combination with alliums and herbaceous perennials.

apr-may 25 cm 100/m²

SCILLA MISCHTSCHENKOANA - STRIPED HYACINTH

Soft blue early flowering. Compact and refined; suitable for borders, grass and combinations with other naturalising species.

feb-mar 12 cm 150/m²

ORNITHOGALUM UMBELLATUM - STAR OF BETHLEHEM

Strong naturaliser with star-shaped blooms. Suitable for grass and open spaces in sun and partial shade; robust under low maintenance.

apr-may 15 cm 100/m²

SCILLA SIBERICA - SIBERIAN SQUILL

Intense blue and highly suitable for naturalising in sun and partial shade. Provides a strong early spring accent and spreads readily.

mar-apr 15 cm 150/m²

SCILLA BIFOLIA - ALPINE SQUILL

Scilla bifolia attracts early bees. Plant in sun to partial shade in well-drained soil. It naturalises gradually through offsets and, under suitable conditions, by seed.

mar 10 cm 150/m²

TULIPA SYLVESTRIS - WOODLAND TULIP

Botanical tulip with a natural appearance. Suitable for grassland and parks in sun and partial shade. Returns year after year and reinforces historic character.

may 30 cm 150/m²

Assortment

**A VERSATILE COLLECTION
OF FLOWER BULBS
SHAPED BY CRAFTSMANSHIP,
PROVEN IN PRACTICE**

JUB Holland's range of loose flower bulbs is broad, carefully curated and focused on reliable performance in the public green space. From botanical selections to bold statement bloomers, and from early spring accents to pronounced seasonal highlights, each cultivar is purposefully chosen for vitality, uniformity and practical suitability in both design and maintenance. This is not a random assortment, but a collection in which every bulb fulfils a clear function.

CAREFULLY SELECTED RELIABLE IN EVERY DESIGN

"My work begins when the bulbs arrive. We inspect quality and varietal authenticity by taking samples. During storage, we maintain optimal climate conditions to ensure maximum flowering performance. The bulbs are tested throughout, as certain diseases only become visible at a later stage. Before dispatch to our customers, they undergo a final check. The result is a high-quality product that brings spring to life."

Bastiaan Breed

Quality Manager, JUB Holland

Assortment BIO / Organic bulbs

CERTIFIED & CONTROLLED ORGANICALLY GROWN FLOWER BULBS

JUB Holland's organic bulb range has been developed in close collaboration with our SKAL-certified growing partner. Selected varieties are contract-grown, enabling us to expand our reliable organic assortment in a focused and consistent way, year after year. This close partnership ensures continuity, transparency and full oversight of the entire cultivation process.

SKAL NL-BIO-01

MAKING AN IMPACT TOGETHER ORDER YOUR ORGANIC BULBS EARLY

Organic bulb production still represents a relatively small, though steadily growing, share of total output. By ordering early in the year, you help us consolidate demand and secure volumes with our organic grower in good time. This creates scope for forward planning and investment, while ensuring availability for your project. Want to find out more? Scan the code.

*Allium
sphaerocephalon*

A RANGE BUILT ON PARTNERSHIP AND RESPONSIBILITY

"Organic bulb cultivation is about balance. Together with our grower, Anthon Bom, we focus on soil health, crop rotation and natural resilience. All bulbs are grown without chemical crop protection products, in healthy soils and with respect for people, plants, animals and the environment. In this way, we are building an organic range you can rely on."

Peter Pennings

Cultivation Specialist, JUB Holland

TERMS AND CONDITIONS OF SALE AND SUPPLY OF FLOWER BULBS JUB HOLLAND

- Jac. Uittenbogaard & Zonen B.V. and its affiliated companies are referred to as 'JUB Holland'. JUB Holland is affiliated with Anthos, the Dutch sector organisation for companies that trade in flower bulbs and arboriculture products. Anthos has drawn up general conditions for the sale and supplying of flower bulbs.
 - The Anthos terms and conditions and these supplementary JUB Holland terms and conditions apply to all contacts, contracts and trading with JUB Holland, which are hereinafter referred to together as 'the applicable terms and conditions'.
 - JUB Holland sends the applicable terms and conditions to its potential contractual parties upon the initial contact, so that they are able to take note of the applicable terms and conditions before a contract with JUB Holland is concluded. The applicable terms and conditions can also be found on the JUB Holland website.
 - JUB Holland explicitly rejects all general terms and conditions (for sale and purchase) from contractual parties, which means they do not apply to contacts, contracts and trading with JUB Holland, unless agreed otherwise in writing beforehand and signed by JUB Holland.
- Agreement**
- An agreement including the applicable terms and conditions is concluded by means of a written confirmation by JUB Holland of an order or delivery, or by the unconditional and unamended acceptance by a contractual party of a proposal, offer or quotation made by JUB Holland and/or by the retention of products from JUB Holland.
 - Quotations and quotes made by or on behalf of JUB Holland are made without obligation and have a validity of 30 days, following which time quotations and quotes made by JUB Holland no longer apply and are invalid.
- Supply and delivery**
- Products are supplied ex works JUB Holland in Noordwijkerhout.
 - If JUB Holland is unable to supply due to force majeure, for example due to disappointing harvest results, then JUB Holland reserves the right to cancel or adjust the agreement in whole or part.
 - Any delivery time quoted is deemed to be approximate and is never a strict deadline. JUB Holland is not liable for any injury (including harm, losses and damage) that results from late delivery.
- Prices and Payment**
- The prices for JUB Holland-products are quoted in euros (€) exclusive of VAT and exclusive of additional costs, including those for packaging, inspections, levies and taxes. The price list issued by JUB Holland states the prices and the minimum order quantity per product.
 - Payment must be made no later than 30 days after invoice date. If payment is made within eight days then a 1% payment discount is given. If the payment deadline is exceeded then the contractual party is automatically in default, in which case JUB Holland is entitled to charge the statutory rate of interest and statutory payment collection costs, to suspend subsequent deliveries or to require payment in advance from that date.
- JUB Holland retains ownership of its products until all its invoices have been paid in full. JUB Holland is entitled to fetch back products that have not been paid for on time. A contractual party is not permitted to resell unpaid products or to use them or provide them as collateral.
 - JUB Holland is allowed to require payment in advance from new, foreign or poor paying contractual parties before the delivery of products is made.
- Complaints / liability**
- A contractual party is required to inspect products for detectable defects as soon as they are delivered and to inform JUB Holland of these in writing within 7 calendar days. After this period, the products will be deemed to comply with the customary quality requirements and all complaints will be invalid.
 - Claims and/or complaints do not entitle a contractual party to suspend payments.
 - JUB Holland is insured against injury or damages that result from an attributable failure for an amount of 5 million euros per year. In addition to Article 8.2 of the Anthos terms and conditions the liability of JUB Holland is limited to the net invoice value of the products, directly related to the claim, in the last 3 (three) months and with a maximum of € 25.000,-.
- The full applicable terms and conditions of sale and supply of flower bulbs JUB Holland, including the ANTHOS conditions, can be found on the website: www.jubholland.nl**
