

KORDES **ROSES**

COMMERCIAL CATALOGUE 2026/2027

VALID FROM SUMMER 2026

KORDES ROSES

SHAPING CHANGE. PRESERVING QUALITY.

Dear business partners and rose lovers,

The world of gardening is changing: today's customers want not only hardy, sustainable and visually appealing plants, but also guidance, knowledge and inspiration. For us at Kordes Roses, this means combining our tradition of high-quality rose breeding with new forms of support – so that you can continue to offer your customers exactly what they are looking for.

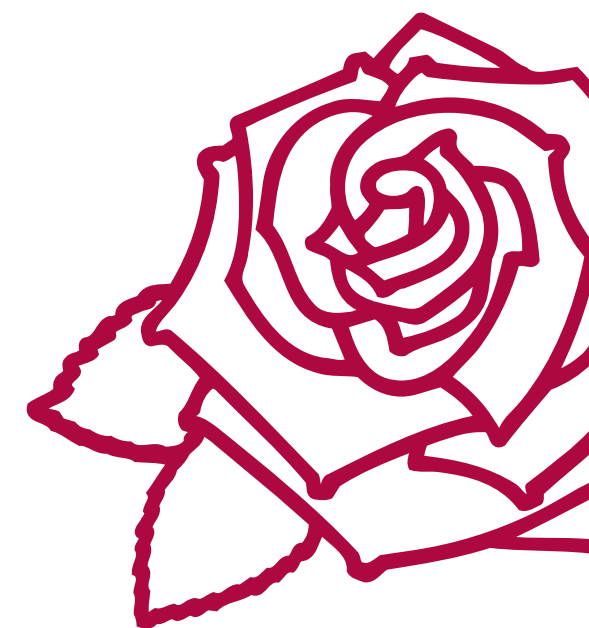

Our current range combines tried-and-tested varieties with exciting new additions that impress with their health, diversity and modern breeding objectives. At the same time, we are investing in contemporary services: for example, a chatbot on our consumer website has recently been helping us to make rose-related knowledge accessible around the clock – a step towards making advice and information even easier and quicker to access.

What remains unchanged, however, is our commitment to standing by your side as a reliable partner. With experience, passion and the firm determination to continue growing alongside you and to actively shape the future of horticulture.

We thank you for your trust and look forward to another year of successful collaboration.

Warm regards

The Kordes family
and the entire Kordes Roses team

EXPLANATION OF SYMBOLS

GROWTH

The height and width next to the growth characteristics symbol are given in centimetres and are approximate values that may vary depending on the location or region. The width can also be used as the planting distance.

flat, creeping

broad and bushy

upright

arched, overhanging

climbing

NOTE: Information on growth characteristics, fragrance and disease resistance is based on our own experience and observations and may differ from the information in this catalogue in other soil or climate conditions.

	DISEASE RESISTANCE	FLOWER FILLING	FRAGRANCE
★★★★★	excellent	double flowers	intoxicating
★★★★☆	slightly susceptible to diseases, self-sustaining regeneration	well-filled flowers	intense
★★★☆☆	Moderate susceptibility, plant strengthening agents recommended	semi-double flowers	strong
★★☆☆☆	high susceptibility, treatment recommended	slightly filled flowers	delicate
★☆☆☆☆	Very high susceptibility, treatment necessary	single flowers	light

DISTINCTIVE CHARACTERISTICS

ADR stands for Allgemeine Deutsche Rosenneuheitenprüfung (General German Rose Novelty Test). Rose varieties with this symbol have successfully passed the toughest rose test in the world! They are characterised by above-average disease resistance, flowering ability, sturdiness and winter hardiness.

These varieties have been awarded medals and/or special prizes at international rose competitions.

These varieties are characterised by their intense fragrance.

These slightly filled or unfilled varieties are particularly attractive to pollinators.

NEW FOR 2026

SEVEN ROSES THAT SET NEW TRENDS

With its new rose varieties for 2026, Kordes Roses once again demonstrates just how diverse modern rose breeding can be today.

Discover new garden roses that combine diversity, vitality and beauty in a unique way.

FLORIBUNDA ART DECO®

A colourfully extravagant garden rose with medium-sized, semi-double flowers that have good vase life. The very healthy, dark green glossy foliage provides a striking contrast to the light flower colour. Part of the Fantasia® collection.

ORDER NO.: 4774

SEE PAGE 35

PATIO ROSE JULIE®

Compact, bushy-growing patio rose with densely filled, lightly scented, rounded flowers in clusters and very healthy foliage. An addition to the Lilliputs® collection, particularly suitable for containers on terraces and balconies or as a low standard rose.

ORDER NO.: 4776

SEE PAGE 67

SHRUB ROSE LUCKY RED®

A densely bushy, upright-growing shrub rose with large, fully double, medium-red, lightly scented blooms that droop slightly when opening. The foliage of this vigorous rose shows no susceptibility to common leaf diseases. Ideal for single planting or in small groups.

ORDER NO.: 4778

SEE PAGE 19

FLORIBUNDA EUROPA DONNA®

A richly blooming floribunda with excellent disease resistance (ADR award 2024) and nearly thornless stems. Also insect-friendly and vigorous in growth. Formally named in Luxembourg in cooperation with the breast cancer organization of the same name.

ORDER NO.: 4782

SEE PAGE 36

LANDSCAPE SHRUB ROSE GOLDEN FLEECE®

A low-growing, spreading landscape shrub rose with exceptional disease resistance, confirmed by the ADR award granted in 2024. A variety suitable for mass plantings as well as for planting in containers on terraces and balconies.

ORDER NO.: 4785

SEE PAGE 57

CLIMBING ROSE LUNARA®

A vigorous climbing rose with a very unusual flower colour, whose medium-sized, semi-double blooms appear in small clusters and emit a spicy fragrance. Its large-leaved, leathery foliage shows above-average resistance to fungal diseases.

ORDER NO.: 4779

SEE PAGE 9

FLORIBUNDA PAPAGAYO®

Colourful and very floriferous floribunda with an upright, bushy growth habit. Its semi-double blooms appear in lush clusters, framed by very healthy, dark green, glossy foliage. An addition to the Fantasia® collection.

ORDER NO.: 4768

SEE PAGE 36

CLIMBERS & RAMBLERS

Discover our diverse range of **climbing roses**, which enchant with their large, nostalgic flowers in single or semi-double varieties. These climbing roses come in bright colours and reach a height of around 200 to 300 cm. By training the shoots horizontally on trellises, fences, walls, rose arches or climbing obelisks, flower formation is stimulated.

Our **Climbing Max® collection** includes our most beautiful climbers for climbing supports or as privacy screens.

In delicate pastel shades and with impressive vigour and abundance of flowers, the **rambling rose** often reaches heights of up to 400 cm and more with its long, flexible shoots and winds perfectly along pavilions or arbours.

For those who don't have quite as much space in their garden, we recommend the colourful and repeat-flowering new **mini rambling roses** from the **Siluetta® collection**, which, with their good branching, only reach a maximum height of 200 cm.

SHRUB ROSES

Shrub roses usually grow broadly with partly overhanging shoots or – depending on the variety – upright. The repeat-flowering roses with their very elegant or double flowers usually reach a height of approx. 120 to 150 cm – depending on the soil conditions and their location. After approximately two years of development, these easy-care shrub roses can show off their full splendour when planted as solitary plants or form a hedge or privacy screen when planted in groups.

HYBRID TEA ROSES

Those who have the most beautiful roses in their garden enjoy the sight and scent of their beauties inside the house as well. Hybrid tea roses are particularly suitable for this purpose. They grow upright and reach a height of approx. 70 to 120 cm, depending on the variety. The flowers appear individually or in slightly branched clusters, making them perfect as cut roses for vases. The beguiling scent of the roses rounds off the summer decoration.

Our recommendation: In the **Eleganza®** and **Eleganza® Antique®** collections, we have brought together our finest favourites with their special characteristics.

FLORIBUNDA ROSES

Floribunda roses are characterised by their low growth of approx. 50 to 80 cm. They create a particularly breathtaking impression when planted over a large area. But they are also perfect as charming eye-catchers in cottage gardens – between perennials such as delphiniums, sage or gypsophila – and are an absolute delight in the garden. Floribunda roses combine excellent characteristics with healthy foliage and are often attractive to pollinators. Some varieties shine with a nostalgic flower shape.

Our recommendation: To help you choose the perfect floribunda, we have assigned many of them to our **Sunflare® Roses**, **Rigo Roses®**, **Fairytale Roses** or **Nectar Garden®** collections, which are characterised by other special features.

KORDES HELPS – LIONS-ROSE®		
For over 20 years, Kordes Roses has been supporting the Peace Village in Oberhausen together with the Lions-Club Elmshorn through the sale of the cream white floribunda Li- ons-Rose®. Since 2003, over €400,000 has been donated to the Peace Village in Oberhausen/North Rhine-Westphalia, where children from war and crisis zones are taken in after inpatient treatment and receive further rehabilitation measures before returning to their home countries.

KORDES HELPS – MENTOR®-ROSE	
The Mentor®-Rose was named in cooperation with the Mentor Foundation Germany . Mentor was founded in 1994 by Queen Silvia of Sweden and pursues the global goal of empowering and supporting young people aged 13 to 17 in order to prevent social isolation and improve their future prospects. For every Mentor®-Rose sold, €1.00 goes to the Mentor Academy , the training programme for mentors.

LANDSCAPE SHRUB & GROUNDCOVER ROSES

Cover the ground! Landscape shrub roses are useful summer flower carpets that make life easier because they require very little care. These robust and hardy roses bloom throughout the summer and into autumn. Depending on the variety, landscape shrub roses reach a height of at least 30 cm to a maximum of 100 cm.

Our recommendation: **Sunflare® Roses**, **Nectar Garden®** and **Rigo Roses®** collections contain many landscape shrub and groundcover roses and provide information about their different characteristics.

MINIATURE ROSES

With their delicate foliage and small flowers, **miniature roses** are the compact kings among flowers, as they rarely grow taller than 50 cm. Varieties with a similarly compact growth habit but slightly larger flowers are known as **patio roses**, as they are ideal for use in garden areas such as balconies or terraces. Our miniature and patio rose range can be found in the **Lilliputs®** and **Nectar Garden®** collections.

HISTORIC ROSES

Historic roses or 'old roses' is a classification for roses that were already commercially available before 1867. They often grow like shrubs and frequently develop well-filled, fragrant flowers. These roses fit into any garden and shine with a uniquely lush bloom. In autumn, they often adorn themselves with rose hips, providing nourishment for birds. With their natural charm and excellent winter hardiness, historic roses are still popular today and form an integral part of our range.

ROSE DE RESHT

F. J. GROOTENDORST

WILD ROSES

Wild roses are the robust and easy-care ancestors of garden roses. Many species have a beguiling fragrance and are considered particularly valuable from an ecological point of view. They grow very vigorously and develop a distinctive shrub rose habit. In autumn, the mostly once-flowering wild roses take on a beautiful appearance thanks to their reddish-coloured rose hips.

ROSA RUCOSA

ROSA CANINA

FLOWER COLOUR: pink with lighter centre

OUR GARDEN ROSE COLLECTIONS

Discover our carefully curated collections, which present our most beautiful and best garden roses in a thematic overview. Whether you are looking for enchanting scented roses in our Parfuma® collection, prefer heat-tolerant and robust varieties in the Sunflare® Roses or Rigo Roses® collections, or want to be inspired by the extraordinary colours and unique patterns in our Fantasia® collection – you are guaranteed to find the right selection for every garden.

The **Parfuma®** collection of fragrant roses brings a true sensory experience to summer. **Parfuma®** hybrid tea and floribunda roses offer a superb combination of opulent fragrance and floral colour with healthy leaves. For years we've been working hand in hand with professional perfumer Claudia Valder describing the rose's scent. The soul of a rose is its fragrance!

Climbing Max®

COLLECTION

A fabulous floral display, brought to your customers' garden by **Climbing Max®** roses. These versatile climbers with their distinctive blooms put on their best show when most of the long shoots are trained horizontally. **Climbing Max®** roses with their unique charm reach a height of 250 cm and love growing on trellises, fences, walls, rose arches or obelisks. Thrill your customers with the marvellous sight and soft to intense fragrance of a **Climbing Max®** rose as it conveniently presents itself both at eye and nose level.

Eleganza®

COLLECTION

The noble elegance of these beautiful hybrid tea roses with their delicate to intense fragrance can hardly be surpassed in the garden. The hybrid teas with high-centred flowers and bold vertical growth reach a height of 70 to 120 cm. In contrast, our **Eleganza® Antique®** collection contains varieties of hybrid tea roses with modern, umbellate and wide-ranging flower forms.

SEE YOU®

COLLECTION

The single, sparsely filled flowers of our Persian **SEE YOU®** collection are studded with a single eye in the centre which literally attracts everyone's gaze. At the same time the flowers display impressive strength and determination, holding out for up to three weeks in the summer rain or shine.

The range of floribunda roses offers all rose lovers a taste of the orient and magic of 1001 nights.

Rigo Roses®

COLLECTION

Rigo Roses® are hardy, low-maintenance prolific bloomers with healthy foliage. This compilation of rose varieties is a consequence of many years' experience employing breeding, testing and trialling free of chemical herbicides.

Rigo Roses® grow even in gardens with little sunlight and all possess the ADR certification, the highest distinction awarded to garden roses.

Lilliputs®

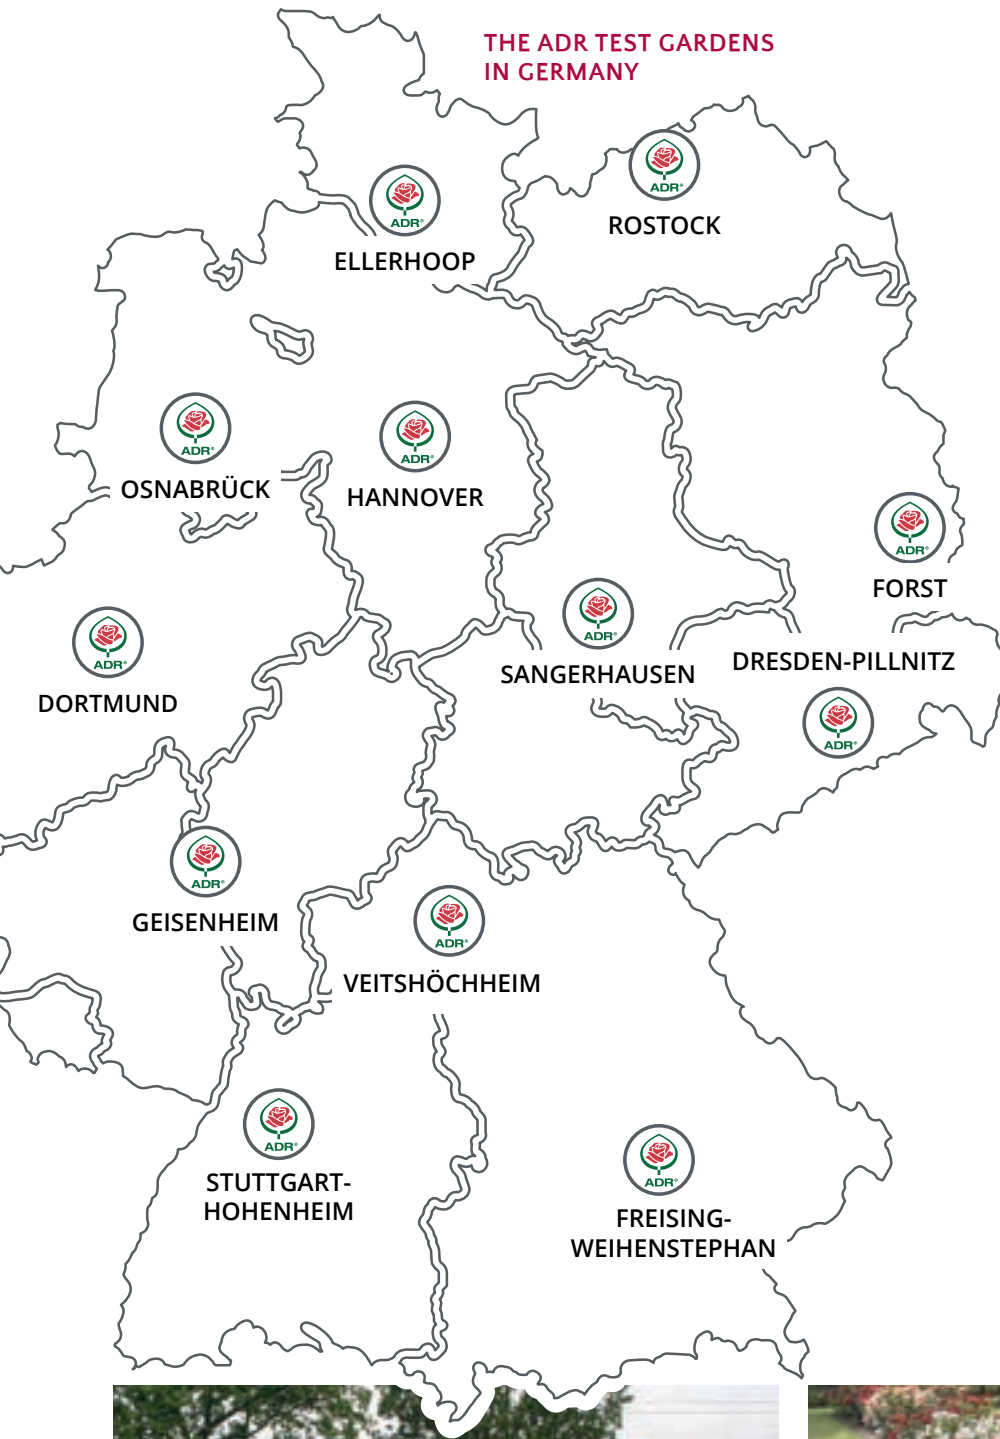

COLLECTION

Tiny gardens, patios and balconies have no reason to miss out on the comforting presence of roses. The exceptional **Lilliputs®** collection of miniature roses simply proves that a healthy and colourful display of flowers is also possible in small spaces. This rose type fascinates with its maximum height of 50 cm and a wide range of flower styles and colours. Whether in framed flower beds, small tubs or balcony boxes, the little beauties bring a sparkle of bliss with their combination of floral beauty and low, compact growth.

ROSELAX® COLLECTION OF
ADR-AWARDED VARIETIES

New rose varieties are introduced to the market every year. In order to assess the quality and resistance of new varieties, the varieties submitted for ADR evaluation undergo three years of testing in 12 independent test gardens. The main focus is on resistance to leaf diseases, flower effect, fragrance, growth habit and winter hardiness. No chemical pesticides are permitted for the evaluation, so that only resistant varieties receive the ADR rating. This promotes the breeding of healthy, high-performance roses and contributes to the protection of nature and the environment. After completion of the tests, the results are compiled at the Bundessortenamt (Federal Plant Variety Office) in Hanover/Germany, discussed and proposed for the ADR certification.

At Kordes, we also consistently refrain from using chemicals in breeding and testing. In the list of over 160 current ADR roses (available at www.adr-rose.de), Kordes accounts for the largest share with over 80 varieties, which confirms the quality and longevity of our breeding work. In our ROSELAX® collection, you will find all ADR-certified varieties – a selection that makes sustainability and resilience easy to experience.

- B quality: at least 2 shoots; 20% discount

DELIVERY TIME:

- Mid-October to mid-May
- Shipping is suspended during frost periods

We would be happy to send you our latest offers by email. Please call us or send us an email with your details. You will find your contact persons on page 4.

STRONG ROSES FOR PUBLIC GREEN SPACES

,URBAN' STREETLIGHT®

Extremely robust and very easy to care for: our ,Urban' Streetlight® roses are the first choice when it comes to professional design concepts for public green spaces. From planting traffic islands and green strips to sophisticated container designs for exclusive outdoor facilities, these roses with healthy foliage and abundant blooms are ideal for all areas requiring greenery.

UP TO ANY CHALLENGE

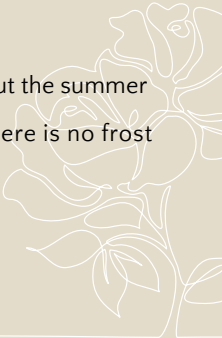

,Urban' Streetlight® roses love a challenge. These roses with their long-lasting blooms can be planted regardless of the season and are perfectly adapted to the fast-paced urban environment. They withstand extreme temperatures as well as all other influences to which plants in public green spaces are exposed.

NATURAL ACCENTS

Simply natural: even in the hustle and bustle of the city, ,Urban' Streetlight® roses create a pleasant, natural atmosphere and are therefore not only visually appealing, but also ecologically valuable, as their long flowering period attracts bees and other insects.

ALL BENEFITS AT A GLANCE

- **OWN-ROOT ROSE:** no wild shoots
- **COVERING:** hardly any weed growth
- **NATURAL:** abundant pollen source throughout the summer
- **STRESS-FREE:** can be planted anytime when there is no frost
- **FROST-RESISTANT:** no laborious hilling
- **CARE:** mechanical pruning possible
- **REGENERATION:** even after heavy pruning

QUALITY IN THE POT

Own-root, robust and floriferous roses in 1.5-litre pots for professional landscaping in public green spaces.

A robust and easy-care variety from our ,Urban' Streetlight® collection

GREEN SPACES AND PARKS

Ground-covering and inexpensive to grow. ,Urban' Streetlight® roses transform green spaces and parks into attractive flowering landscapes.

Ideal for large-scale planting

TRAFFIC ISLANDS

Lightening up and blooming profusely: special greenery is used to highlight roundabouts and other features in the streetscape. With ,Urban' Streetlight® roses, they become attractive green landmarks.

URBAN STREETLIGHT

STANDARD TREE ROSES

Standard tree roses are various varieties of roses that have been grafted onto a wild rose stem. They are available in stem heights of 60, 80 and 120 cm. They are particularly suitable as container plants on patios and balconies or for individual planting in a flower bed.

ABOUT W. KORDES' SÖHNE

TRADITION AND INNOVATION IN ROSE BREEDING

W. Kordes' Söhne is a traditional company with over 135 years of experience in breeding garden and cut roses. Our aim is to develop high-quality roses that are not only beautiful, but also robust, healthy and resilient. Our roses are appreciated worldwide and thrive in almost all climate zones, with our varieties known for their flowering ability and longevity. We are particularly proud of our numerous ADR-awarded varieties, which have passed the most demanding rose test in the world.

Test field

Production field

SUSTAINABILITY AND ENVIRONMENTAL AWARENESS

Sustainability and environmental awareness are not just buzzwords for us, but are firmly anchored in our corporate culture. For over 30 years, we have consistently refrained from using fungicides in the cultivation and testing of our garden roses. Our test fields are characterised by healthy, fungus-resistant roses that meet the wishes of many customers for flowering, colourful and resilient varieties. Our goal is to protect the environment while producing high-quality roses.

SUSTAINABLE PRODUCTION MEASURES

Another focus is on sustainable production. For over 20 years, we have been collecting rainwater from our greenhouse roofs, which is recycled through a closed water circulation system.

In the production of our container roses, we use peat-reduced soil, which results in 25% less CO₂ emissions compared to conventional substrates. Our packaging is made from recycled paper with a high grass content, and we have been using biodegradable lactic acid pots for our potted roses for years, which reduces our CO₂ emissions by 30%. In the future, we plan to further expand our photovoltaic systems and switch to 100% peat-free soil in order to further reduce our ecological footprint.

GLOBAL BREEDING AND QUALITY CONTROL

In addition to garden roses, we are also one of the world's leading breeders of cut roses. Our head office in Germany handles the breeding of the first selection stages, while our varieties are tested in various climate zones around the world – including Kenya and in partnerships in over 30 countries. This ensures that each region receives the varieties that are right for it.

Our Kordana® potted roses have also become synonymous with quality: miniature roses that are used in homes and gardens and now have a market share of over 30% worldwide. These varieties are bred and tested at our facilities in Sparrieshoop/Northern Germany and Denmark, with production carried out by our partner Rosa Danica®.

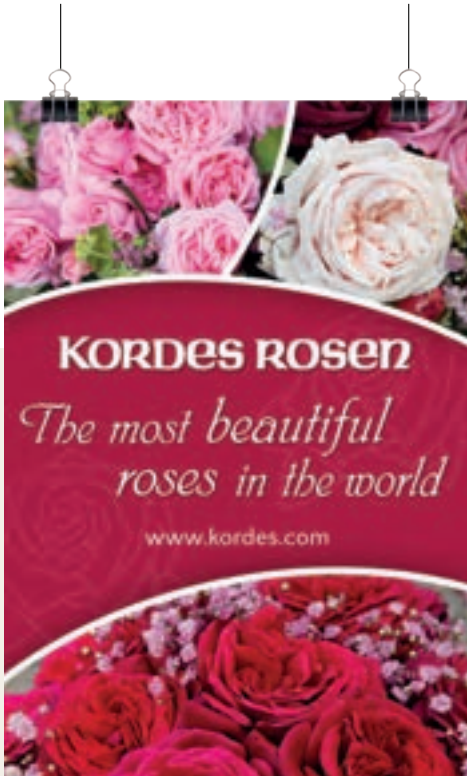

PROMOTIONAL MATERIALS

To increase impulse buying at the point of sale and present our products effectively, we offer a wide range of advertising materials. Commercial gardeners and licensees can order these advertising materials in various languages.

Our sales aids include table covers, posters, flags, banners in custom sizes and variety labels – all produced by our partner PLANTPRINT. The impressive image quality and high luminosity of PLANTPRINT products ensure an appealing presentation of your offerings.

If you have any questions or would like to place an order, please contact PLANTPRINT directly at +49 (0) 2131 - 7726-834 or info@plantprint.de.

For further information or support, please contact us by email at info@kordes-rosen.com or by telephone on +49 (0) 4121 48700.

POSTERS

Available with the Kordes Roses motif and with motifs from our various collections. Material in UV print with high-quality protective laminate.

DIN A3 (29.7 x 42 cm, W x H) at a price of €5.59 each plus VAT and shipping

FLAGS

Size 45 x 120 cm
€29.90 each plus VAT and shipping
Available with Kordes Roses motif and with motifs from our various collections.

Hot-dip galvanised flagpole:
Height 240 cm
Includes one flag
€99.90 each plus VAT and shipping

Galvanised flagpole

TABLE COVERS FOR SALES TABLES

Available with the Kordes Roses motif and with motifs from our various collections in the format 150 x 29.7 cm (W x H). Material in UV print with high-quality protective laminate at a price of €24.99 per running metre plus VAT and shipping.

You can enquire about table covers and the corresponding price for your desired sales table size individually from PLANTPRINT (www.plantprint.de).

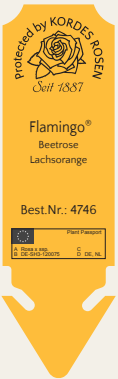

VARIETY LABELS

Our sales aids for individual rose varieties can be ordered in your desired size. Material in UV print with high-quality protective laminate.

VARIETY LABELS

We offer you the opportunity to use our labels for individual varieties in your advertising campaigns. Please contact your contact person (see page 4) for more information.

BREEDER LABEL

This yellow label is the original breeder label printed for Kordes Roses. It must be attached to every Kordes rose, regardless of where it is sold. This is because Kordes roses are also propagated and sold under licence. Before Kordes breedings are sold, they must undergo practical testing for almost 10 years. This label is therefore a reliable guarantee of variety authenticity.

Rose varieties with this logo are protected by plant variety rights or their name is protected as a trademark.

® The names of these rose varieties are protected as trademarks under trademark law.

All our registered trademark and plant variety rights (including international ones) can be found in the imprint at www.kordes.com

VARIETY LISTING FOR LICENSEES

Our licensees will find all available rose eyes for propagating garden roses in the current variety list, along with the applicable propagation fees. Please contact your contact person (see page 4) for more information.

PLANNING GUIDE

ROSES FOR EVERY OCCASION

Choosing the right rose variety is a crucial step for successful planting – and for many years of flowering joy. There is a suitable rose for almost every location and every use. On the following pages, you will find a selection of varieties that have proven themselves particularly well for various purposes and even under difficult conditions.
