Dear Ladies and Gentlemen,

Here is the Volmary young plants & seeds catalogue for spring 2027–2028. The product range includes our best varieties and has been expanded to include lots of attractive innovations. All varieties have proven their excellence in an international comparison.

Benefit from our own creations, such as **Dahlia 'Lubega'**, **Sanvitalia 'Solaris'**, **Verbena 'Vectura'** and the world-leading **Thunbergia series 'Sunny Susy'**. With the **'Vienco'** lavender range, you can enjoy outstanding variety that was bred in-house and developed specifically to meet the requirements of modern pot and container cultivation. The early-flowering, compact **lavender 'Vienco' Early White** is ideally suited for annual cultivation with an early sales start and has established itself as the best white-flowering lavender on the market. Our proprietary **Echinacea 'Papallo'** variety is ideal for producing flowering containers. This compact-growing range exhibits very good basal branching and vibrant flower colours.

Our **PI-resistant tomatoes and potatoes** stand out for their resistance to late blight (*Phytophthora infestans*), making outdoor cultivation more reliable and offering a more secure yield. The **vine tomato 'Phantasia'** and the **cherry tomato 'Philovita'** have proven themselves to be excellent in this regard. These are now supplemented by the mini **plum cherry tomato 'Phiabella'**, the **midi San Marzano tomato 'Phiavita'** and the **cocktail tomato 'Phialina'**, all organic. All these varieties impress with their sweet, aromatic flavour. The seed-propagated **'Adessa' Protect' vitality potato** also offers high resistance and can even be grown right next to tomatoes without an increased risk of disease. All these varieties are ideal for marketing at garden centres.

We offer you a high-quality, wide range in trays of 45, 84 or 128 units for our organically **certified** young herb plants. One exciting innovation on the herb market is the wonderfully fragrant, insect-friendly **flowering basil 'Belmona'**, with dark purple ('Belmona' Purple) or pink ('Belmona' Pink) flower panicles. These compactly growing varieties are hardy, flower early, and are ideal for marketing during the bedding and balcony season.

In production, our sustainable **264-type reusable tray**, which is compatible with potting robots, impresses with its excellent lifting quality and a relatively high substrate volume, ensuring optimal growing conditions. After potting, the sustainable trays can be stacked in a space-saving manner.

More and more gardeners and marketers are recognising how valuable and effective targeted marketing is. In this way, good results are achieved through partnership and cooperation. Our marketing on the product, in retailers, and also online is convincing, and creates a comprehensive **Volmary® world of brand experience** for emotional and colourful moments.

Alongside ordering seeds and young plants around the clock, **Volmary's online portal** offers you many other benefits such as current information on availability and marketing materials for your sale.

The best products and targeted information are critical to your success! Our international connections to research, breeders, seedling producers, production gardeners, marketers, and the media put leading varieties and first-hand knowledge at your disposal.

Our experienced **employees in the field and in the office** can provide you with trustworthy advice on issues relating to varieties and cultivates. Make the most of this opportunity!

With kind regards

Management and staff

What drives us

As plant professionals, we have been known for high product quality and expertise in seeds and young plants for flowers, vegetables, fruit and herbs for 100 years. We support our customers through our partnership-based approach, with an innovative product range and individual service. In doing so, we are driven by the goal of contributing to a positive attitude towards life with plants, bright colours, joy and pleasure.

Exclusive varieties

New and particularly powerful varieties are paramount for offering your customers a modern and high-quality assortment of flowers and vegetables. Volmary®'s Plant Breeding and Information Centre in Münster offers great opportunities to become familiar with new varieties. Exact, practice-relevant cultural recommendations emerge from intensive varietal tests. All new varieties undergo multi-annual tests in Volmary® greenhouses and on their own Volmary® test fields, being also tested for outdoor and bed suitability

SUSTAINABILITY THROUGH RESPONSIBILITY –

throughout the entire value chain

At Volmary, we are continuously working to further develop our production processes with the aim of handling our resources in an even more sustainable and environmentally friendly way. Our entire production chain is constantly being optimised. On the way to more **sustainability**, we at Volmary rely on various building blocks too.

As plant cultivators, we focus on the cultivation of **more resistant or tolerant** plants as well as on climatically adapted **cold or heat-tolerant plants**. In addition, the cultivation of compact plants that do not require any or only a small amount of growth inhibitors plays a major role for us.

We use natural resources such as water, substrate, fertiliser and energy as sparingly as possible in our production. **Integrated plant protection** and the use of beneficial organisms is standard practice for us. The use of **Multikraft plant fortifiers** makes our plants more resistant and robust.

Volmary offers an **extensive ORGANIC range** of vegetables, herbs and fruit and, by arrangement, also organic flowers. You will receive these in the form of organic young plants, unrooted organic cuttings (URC) and organic seeds. Thanks to our ORGANIC products, you too can produce sustainably.

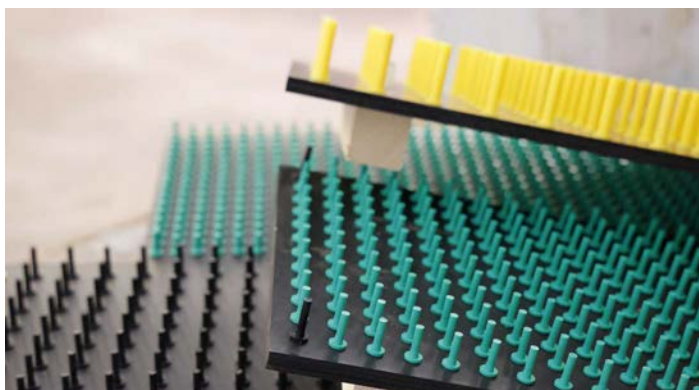

Don't forget! We also focus on sustainability when it comes to our trays. That's why we collect them from you for reuse. Please speak to your sales representative about this.

264-type reusable tray

Sustainable trays

The **264-type reusable tray** was specially developed for efficient and sustainable plant production. It is compatible with picking robots and convinces with an improved lifting quality. Thanks to the relatively high substrate volume, the plants benefit from better growth conditions. The compatible software programs and actual dimensions for TTA and Visser machines allow for seamless integration into existing production processes. Furthermore, the trays can be stacked in a space-saving manner after potting, so that they only take up a small freight volume on the way back to Volmary – this is another way in which we contribute to sustainability through multiple use.

Lifting plates suitable for Volmary young plant trays

Returning empty trays is easy: to arrange collection, please contact your designated Volmary sales representative. The collection process will be organised for you in its entirety. You will receive notification of the collection date, so that you can have the trays ready in good time.

New, precisely fitting labelling plates

Thanks to the sturdy wooden board and the durable plastic pins, our labelling plates are now even more stable. Longer pins on the outer edges ensure significantly improved locking. In addition, individual pins can be easily replaced as needed.

HIGH-QUALITY RAW MATERIALS –

Unrooted cuttings & seeds

Alongside its rooted seedlings in various tray sizes, Volmary offers production companies a wide range of **unrooted cuttings (URCs)** and high-quality seeds. Larger undertakings, especially, will appreciate the possibility of obtaining unrooted cuttings directly from our mother plant farms. Due to their standardised preparation and high degree of uniformity, almost all varieties of our cuttings are also ideal for the use of cutting robots.

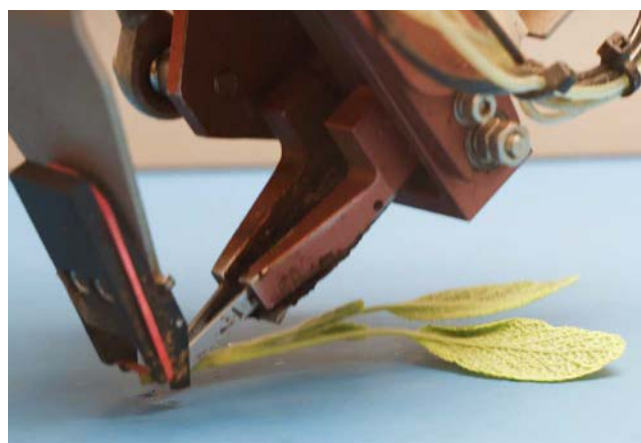

Good starting material is the foundation for successful crops – and this applies to cuttings as well as to seeds. Our **professional seeds** impress with their high germination capacity, varietal authenticity and uniform development. To ensure you can plan the start of cultivation optimally, we recommend placing your order well in advance. In addition to traditional varieties, our range also includes the latest breeding developments, such as DMR sunflowers and high-quality pumpkin varieties. These varieties are characterised by particularly high yields and excellent crop stability – a real asset for your production.

Sustainability has a tradition in our family business. That is why we are continuously optimising our production processes to ensure the responsible use of resources. We are also committed to the well-being of our staff and the protection of the environment. Our international production sites are **MPS-certified** and guarantee you the highest-quality raw material. Further international sustainability standards at various locations confirm our successes in sustainable business. What's more, the Volmary Group holds both **organic certification** and the **GLOBALG.A.P. certification**.

Whether young plants, unrooted cuttings or seeds – with Volmary, you can rely on quality, safety and sustainable production standards.

MARIGOLDS FOR FIGHTING NEMATODES ASTERACEAE

1000		°C		
6-10*/15-20**	V-VII	15-18	10-17	-

*) Early sowing: 6-10 kg/ha

**) Late sowing: 15-20 kg/ha

Nematodes have become a yield-reducing or even a total failure problem in some areas of horticulture. One way to combat these harmful organisms in the soil is to sow Tagetes before the start of cultivation.

Type					
Nema	-	18-22	OUT	-	-

Naturally beautiful beds

Flower meadows are on trend: they bring colour into the garden and create valuable habitats for insects. With NATURBIENTE® flower mixtures as young plants, Volmary offers a straightforward alternative to sowing.

The pre-grown plants allow for a short cultivation period and can be planted directly and effortlessly into the bed.

1. Resistances

1.1 Terminology

There are different degrees of specification for pests or pathogens in their relationship to plants. The determination of this specification usually requires highly sophisticated analysis techniques. The answer to the question whether a plant can be affected by a pest or pathogen perhaps depends on the applied analysis procedure. It is important to emphasise that the specification of pests and pathogen can generally be subject to temporal and regional fluctuations. The specification also depends on ecological factors, and new harmful organisms or new strains of pathogenic agents that are able to withstand the resistances may develop.

1.2 Definitions

Immunity:

Neither subject to attack by a certain pest nor infection by a certain pathogen.

Resistance:

The ability of a plant type to limit the growth and development of a certain pest or pathogen and/or the damage caused in comparison with susceptible plant types under comparable environmental conditions and pest and pathogen pressure. Under high pest and pathogen pressure, resistant varieties may exhibit some disease symptoms or damage.

Two resistance degrees are defined:

High/standard resistance (HR):

Plant types that highly limit the growth and development of a certain pest or pathogen under normal pest or pathogen pressure in comparison with susceptible plant types. These plant types, however, may exhibit some symptoms or damage under high pest and pathogen pressure.

Moderate/intermediate resistance (IR):

Plant types that limit the growth and development of a certain pest or pathogen, but may exhibit more symptoms or damage in comparison with resistant varieties. Moderate/intermediate resistant varieties will still have less serious symptoms or damages than susceptible plant types when grown under comparable environmental conditions and/or pest and pathogen pressure.

Susceptibility:

The susceptibility of a plant type is the inability of it to limit the growth and development of a certain pest or pathogen.

1.3 Variety Resistance Information

The resistances of our breedings are coded if they have not been noted elsewhere.

For varieties with resistances to more than one pathogen, resistance codes are separated by "/". If a resistance code refers to a particular disease strain, there is no protection against another strain of this pathogen. If the resistance indication does not refer to a certain strain of a pathogen but to uncertain, non-specified strains, it cannot be guaranteed that the respective variety could nevertheless be infected by the stated pathogen.

The resistances indicated in the catalogue are based on current knowledge at the time of printing. A breaking of resistances by the respective pest, however, cannot be excluded.

2. Disclaimer

We have produced our new catalogue with great care, however mistakes are not excluded. We cannot assume any liability for the completeness and correctness of the content.

GENERAL TERMS AND CONDITIONS

Spring product range 2027/2028

General Terms and Conditions of Volmary GmbH

1. General

1.1 The following General Terms and Conditions apply to all sales and licensing procedures that take place within the context of our sales business, insofar as it is not stated otherwise in our offer or in the confirmation of the order.

1.2 Our General Terms and Conditions are exclusively applicable. Any opposing conditions, or any conditions that diverge from the General Terms and Conditions of the ordering party, as well as any side agreements, are only binding if we have expressly agreed to their validity in writing. Our General Terms and Conditions shall also apply if we execute the delivery without reservation, in the knowledge that the Terms and Conditions of the ordering party are contrary to or divergent from our Terms and Conditions.

1.3 The following General Terms and Conditions apply exclusively to companies in the sense of Section 14 of the BGB (German Civil Code).

1.4 Insofar as no divergent provision has been made, the Incoterms 2020 (EXW in accordance with INCOTERMS 2020), including any supplements valid at the time of conclusion of the contract, shall apply in terms of the interpretation of the customary forms of the contract.

2. Offer – Closing of Contracts

2.1 Presentation of our products (seeds, bulbs, seedlings/young plants etc.) in advertising and other materials, including our web pages, do not represent legally binding offers in the sense of Section 145 of the BGB. They are free and non-binding. They are merely to be seen as encouragement to an ordering party to submit orders.

2.2 The binding nature of the order placed by the ordering party, with respect to our company, shall be two weeks from the date of receipt of the order, unless otherwise specified at the time of submission of the order.

2.3 The order shall only be deemed to have been placed upon receipt of our written confirmation. Execution and delivery of the ordered goods or services by us without prior written confirmation shall also be deemed as acceptance of the order.

2.4 If our acceptance – whether in writing or by execution of the order – takes place after expiry of the binding period of two weeks (Clause 2.2), the contract shall nevertheless be deemed to have been concluded, insofar as the ordering party does not react immediately.

2.5 We reserve the right to adjust the varieties, quantities and delivery dates in our order confirmations, according to the actual delivery possibilities. Such changes shall be deemed to have been agreed upon if the ordering party does not object within eight calendar days of receipt of the order confirmation. This shall only apply if the changes made to the order appear acceptable to the ordering party, under consideration of our interests.

3. Delivery

3.1 Unless otherwise agreed in the respective contract, the agreed delivery dates refer to the provision of the goods for handover or dispatch at our production plant in Senden (ex our premises INCOTERMS 2020).

3.2 Insofar as the delivery by our suppliers is not correct or on time, our obligation to deliver shall be suspended. This shall only apply in the event that we or our supplier are not responsible for the failure to meet the deadline.

3.3 Shortages of raw materials or energy, strikes, lockouts, traffic disruptions, official decrees or other restrictions under public law, operational disruptions, all cases of force majeure and other circumstances, in particular trade restrictions as a result of the Corona pandemic, for which neither we nor our vicarious agents can be held responsible and which could not have been foreseen by us, shall release us from our obligation to deliver and, if applicable, from our licensing obligations, for as long as they persist, insofar as these circumstances affect our ability to deliver.

3.4 In the cases of Sections 3.2 and 3.3, we shall be entitled to withdraw from the contract without any obligation to pay damages if performance becomes impossible or unreasonable for us, or if an end to the impediment to the performance is not foreseeable. This shall only apply if we or our vicarious agent are not responsible for the impediment to the performance and if we have immediately informed the ordering party of the aforementioned impediments to the performance. In the event of withdrawal from the contract, we are obliged to immediately reimburse any payments already made by the ordering party.

4. Duty to examine and to notify of defects

4.1 We are entitled to execute orders in the form of partial deliveries, unless otherwise agreed. The ordering party can only justifiably refuse acceptance of partial deliveries if they are objectively of no interest to them. The ordering party shall declare refusal of acceptance in writing; the lack of objective interest must be justified in writing together with the refusal.

4.2 The ordering party shall inspect and examine the goods immediately upon receipt, insofar as this is feasible in the ordinary course of business. Depending on the scope of the delivery, the inspection/examination shall be carried out by taking a sufficient number of random samples, as required. If the ordering party requests a delivery to a third party, they must ensure that an immediate inspection and examination of the goods takes place.

4.3 The obligation of the ordering party to examine the goods and give notice of defects also extends to phytosanitary properties, i.e. in particular to viruses, pest infestations and diseases. If the ordering party suspects the existence of such phytosanitary issues, they must proceed as described in Section 10.7. Furthermore, in particular – especially with regard to the duty to minimise damage incumbent upon themselves – they shall separate the possibly infested or sub-standard goods from other goods, both those delivered by us and those already present at the ordering party's premises, in order to prevent the spread of the infestation/infestation.

4.4 In the event of obvious lack of quality, incorrect deliveries or shortfalls in terms of quantities, the ordering party must notify us immediately, at the latest within 3 calendar days. The notification must be made in writing. Transport staff are not authorised to accept complaints. If the ordering party fails to provide such notification, the goods shall be deemed to have been approved and the ordering party shall not be entitled to claim any rights arising from lack of quality, unless it was not recognisable during the inspection. In all other respects, Sections 377 et seq. of the HGB shall apply.

4.5 The ordering party shall notify us of any quality issue that are not immediately apparent (hidden issues) immediately upon discovery thereof.

4.6 The ordering party is obliged to inspect the goods for transport damage – if necessary by way of appropriate random samples – upon receipt. If any transport damage is detected, the ordering party must immediately prepare a report in which the condition of the goods and the transport damage are recorded. The report must be handed to the transport staff for signature. The ordering party is obliged to report any transport damage to the transport company without delay, together with this report, and to inform us, along with a copy of the report. We shall not be held liable for transport damage – subject to Section 11 – unless the damage was caused intentionally or due to gross negligence, either by us or by one of our vicarious agents.

4.7 The acceptance of a notice of lacking quality on our part does not constitute an acknowledgement of the alleged condition.

5. Prices and Delivery Modalities

5.1 Unless otherwise agreed in the respective contract, all prices are ex our production facility in Senden. All costs relating to the goods, such as duties, insurance, taxes, storage costs, etc., shall be borne by the ordering party once the goods are made available at our production plant in Senden. Shipment shall only take place at the request of the ordering party; in this case, any additional freight/transport costs shall also be borne by the ordering party, and we shall transfer them accordingly.

5.2 The risk of accidental loss of the goods shall be transferred to the ordering party upon handover to the transport company.

5.3 We shall take back sales packaging, within the scope of the statutory obligations. Unless otherwise agreed in the respective contract, such packaging materials must be returned to our production plant in Senden, and this shall be arranged by the ordering party at their own expense.

5.4 Other transport packaging will be charged to the ordering party, unless otherwise agreed. If such materials are returned to us by the ordering party, undamaged, they will be credited accordingly.

5.5 Unless otherwise agreed in the respective contract, the loading of the goods at our production plant in Senden shall be arranged by the ordering party. This also applies in the event that the ordering party commissions the collection of the goods. Insofar as we provide the ordering party or their agents with support during loading, this shall be deemed to be a matter of courtesy on our part. The ordering party or their agents shall be solely responsible for proper loading, and in particular for compliance with the regulations relating to the securing of the load.

5.6 Our prices are based on the listed price at the time at which the order becomes binding, unless otherwise agreed. Insofar as no divergent agreement has been made in the respective contract, the prices are ex our production facility in Senden, excluding packaging and the statutory VAT.

6.0 Conditions of Payment

6.1 Invoiced amounts are due 30 days after the invoice date. Any discounts require an express prior written agreement. Such discounts must be agreed anew for each contract.

6.2 If there is a statutory change in VAT after conclusion of the contract, the value added tax shall be charged at the new rate applicable by law.

6.3 Insofar as partial deliveries are made, in accordance with Section 4.1, or in agreement with the ordering party, we shall be entitled to invoice each partial delivery individually. Invoicing shall be based on the agreed individual prices.

6.4 Payments shall only be submitted to one of our bank accounts, as stated on the invoice.

6.5 Unless otherwise agreed in individual cases, payments made by the ordering party shall always be set off against the oldest outstanding claim. The offsetting shall be carried out in accordance with the statutory regulation of Section 367 of the BGB, i.e. first on the costs, then on any interest and finally on the relevant principal claim. Any other provision of services by the debtor, after the conclusion of the contract, shall be deemed irrelevant.

6.6 Cheques will only be accepted as conditional payment. Payment shall only be deemed to have been made when and insofar as the amount has been irrevocably credited to our account. Any charges incurred by the bank, in particular in the event of dishonoured cheques, shall be borne by the ordering party.

7 Defaults

7.1 The occurrence and consequences of a default shall be governed by the statutory provisions of Sections 286, 287 and 288 of the BGB.

7.2 If the ordering party is in default of payment, we may withdraw from all contracts from the mutual business relationship or only provide further deliveries and services – also for other contracts from our mutual business relationship – dependent on advance payments or securities, at our discretion; we are also entitled to disclose all assignments (Section 9.1) to all customers of the ordering party, and to demand immediate payment to us. This shall not apply if the ordering party is only in arrears with minor amounts and there is no doubt as to their solvency; an arrears in payments shall be deemed to be minor if it amounts to a maximum of 5% of the total order volume from which it originates.

7.3 The ordering party may only offset any counterclaims if these are either recognised by us or have been legally established.

8. Retention of Title

8.1 We retain the title to the goods delivered by us until all claims to which we are entitled from the underlying contract – including any costs, interest and damage caused by delay – have been met in full.

8.2 Our ownership also extends to the goods, plants and products produced by the ordering party through cultivation, processing, blending or mixing of the goods delivered by us, under retention of title. If any of our goods subject to retention of title are processed or inseparably mixed with goods still owned by third parties, we shall acquire co-ownership of the new goods or mixed stock. The extent of the co-ownership results from the ratio of the invoice value of the goods delivered by us under retention of title to the invoice value of the remaining goods.

9. Transfer of Claims

9.1 The ordering party shall be entitled to resell the goods delivered by us within the scope of their proper business transactions. In this case, they hereby assign the claim against their customer arising from the resale to us. The assignment is limited to the amount of our claim arising from the delivery of the resold goods, including any costs, interest and damages caused by delay, insofar as these have already been invoiced to the ordering party and registered. At our request, the ordering party shall disclose all resales of goods not yet paid for, name the recipients in full and provide us with all the required information for the direct enforcement of the claims assigned to us.

9.2 The ordering party is obliged to ensure, by means of suitable agreements with its customers, within the scope of what is legally permissible, that the claims assigned to us are not forfeited by offsetting, but are only fulfilled by payment; to the required extent. They must refer to the assignment for this purpose.

9.3 The ordering party is entitled to collect claims assigned to us from its customers. The ordering party is obliged to immediately forward any such payments received from its customers to us, up to the amount of the claims to which we are entitled. If the ordering party collects claims assigned to us by their customers, without passing them on to us accordingly, we are entitled to disclose the assignment with regard to all claims – also against other customers – and to demand immediate payment to us. Furthermore, we are entitled to revoke the authorisation to collect if the ordering party is in default with the fulfilment of their obligations towards us, in particular regarding payments, or if another circumstance becomes known, which cast doubt on their creditworthiness. If the authorisation to collect lapses

or is revoked by us, the ordering party must inform us immediately, at our request, of the debtors of the assigned claims and provide us with the information and documents required for collection.

9.4 If any third parties, particularly within the scope of compulsory execution or insolvency law measures, want to access the goods that are our property, the ordering party must inform them of our ownership and present the relevant documentation. At the same time, they must inform us immediately. If we incur any costs in defending ourselves against alleged third-party claims to the goods that are our property, the ordering party shall reimburse these costs, insofar as they are not actually reimbursed by third parties; we shall assign any claims against third parties to the ordering party concurrently.

9.5 If the value of the securities granted to us by the ordering party exceeds the sum of our secured claims by more than 20%, we are obliged to release the securities exceeding 20% at the request of the ordering party. We shall select the securities to be released at our reasonable discretion.

10. Guarantee

10.1 Insofar as any goods delivered by us are found to be defective, the cause of which already existed at the time of the transfer of risk, in principle we shall be obliged to fulfil our guarantee obligations, insofar as we are notified of the defect within the limitation period (Section 10.4).

10.2 If the ordering party resells the goods delivered by us and its customer or the last customer in the supply chain is a consumer in the sense of Section 13 of the BGB, the ordering party may submit a claim against us in accordance with the statutory provisions of Sections 478 and 479 of the BGB, by way of so-called supplier recourse. If a justified case of supplier recourse exists, the restrictions on our guarantee obligations as set out in these General Terms and Conditions shall not apply.

10.3 The prerequisite for supplier recourse is that the goods delivered by us are sold to the consumer in an unchanged condition throughout the entire supply chain. Insofar as the goods have been cultivated or otherwise changed, or improperly handled in the meantime, supplier recourse shall not come into consideration. Supplier recourse presupposes that the shortcoming present at the time of handover to the consumer also constitutes a shortcoming in the relationship between us and the ordering party.

10.4 The period of limitation for guarantee claims is one year from the start of the statutory period of limitation. In deviation from this, the statutory periods of limitation shall apply insofar as the ordering party justifiably asserts a claim against us, within the context of the supplier recourse (Sections 10.2 and 10.3).

10.5 If the ordering party breaches their duties of inspection and notification of complaints, in accordance with Section 4, they may lose their rights under guarantee, pursuant to the provisions as set out in Section 4.

10.6 If the ordering party notifies us of any shortcomings, whether in accordance with Section 4 or 4.5, they must give us the opportunity to examine the goods ourselves and/or have them examined by third parties commissioned by us. If the ordering party commissions any third parties, particularly an expert, to inspect the goods or determine any shortcomings, we shall only be obliged to bear the costs incurred if an immediate inspection is objectively necessary and we do not carry out an inspection immediately.

10.7 If the ordering party asserts guarantee claims, we shall initially only be obliged to provide supplementary performance (rectification of the defect or delivery of a defect-free item). If we refuse subsequent fulfilment or if subsequent delivery fails or is unreasonable for the ordering party, the ordering party may reduce the purchase price or withdraw from the contract. Claims for damages on the part of the ordering party are excluded, subject to the provisions in Section 11.2.

10.8 If the ordering party has the right to claim subsequent fulfilment by delivery of goods free of defects, we shall be entitled to adjust the varieties supplied to the actual delivery possibilities, insofar as the deviation is reasonable for the ordering party.

11. Claims for Damages

11.1 Insofar as the ordering party is entitled to claims for damages or reimbursement of expenses due to shortcomings that are not excluded by the above agreements or Section 11.2, they shall be subject to a limitation period of one year.

11.2 Claims for damages or reimbursement of expenses on the part of the ordering party, irrespective of the legal grounds, in particular due to breach of obligations arising from contractual obligations or unlawful acts, shall be excluded, subject to the exceptions stated below:

- In the event of a slightly negligent breach of cardinal obligations, our liability shall be limited to the damage typically occurring in transactions of this type.
- Damages resulting from injury to life, body and health caused by a negligent breach of duty on our part, or a negligent or intentional breach of duty on the part of our legal representatives or our vicarious agents.
- Other damages, based on an intentional or grossly negligent breach of duty on our part or intentional or grossly negligent breaches of duty on the part of our legal representatives or our vicarious agents.

11.3 Furthermore, claims for damages by the ordering party are not excluded with regard to:

- Damages resulting from injury to life, body or health caused by a negligent breach of duty on our part, or a negligent or intentional breach of duty on the part of our legal representatives or our vicarious agents, and
- Other damages, based on an intentional or grossly negligent breach of duty on our part, or an intentional or grossly negligent breach of duty on the part of our legal representatives or our vicarious agents.

12. Advice, Plant Protection, Cultivation

12.1 Storage instructions, planting instructions, information on resistances, plant protection advice and other advice do not form part of purchase and delivery contracts. Unless they are expressly included in the contract, they merely represent non-binding information. They do not release the ordering party from their obligation to store and process the goods supplied by us in an appropriate and professional manner and to exercise the necessary care, especially when using plant protection agents, fertilizers and growth regulators. In particular, the possibility of a break-through of the stated resistances by the respective pest cannot be ruled out.

12.2 Insofar as we carry out plant protection consultations and provide information on resistances, the ordering party is obliged to first carry out a test of the recommended measures on a portion of the goods, if they decide to proceed, in accordance with the advice provided during the plant protection consultations. Only after successful testing may the general implementation of the measures take place. The test plants must be kept under identical conditions to the conditions under which the rest of the plants will be subjected after successful testing of the plant protection measures. Subject to the restrictions in these contractual conditions, we shall only be liable for plant protection advice provided by us if a proper test has been

carried out in advance, and this can be proven by the ordering party. Section 12.2 shall apply accordingly.

12.3 With regard to plant protection, the ordering party must observe the statutory provisions, in particular the Plant Protection Act. Even if we provide advice on plant protection, this does not exempt the ordering party from taking responsibility for the observation of the statutory provisions.

12.4 The ordering party shall be responsible for the cultivation, in particular with regard to the selection and use of growth regulators and inhibitors, fertilizers and plant protection products. The ordering party must ensure that the products used are compatible with one another. We wish to point out that damage may occur if, for example, growth regulators and pesticides that are incompatible are used. We accept no liability for any damage resulting from cultivation errors. Section 11.3 shall apply accordingly.

12.5 Descriptions, illustrations, recommendations for cultivation and other information, in whatever form, either from us or from our vicarious agents, such as information on shelf life, sowing, planting and harvesting dates, or any information and notes on growing and cultivation conditions, are based on practical and experimental procedures, as accurately as possible. In all cases, we shall not be held for any damages resulting from the implementation or use of such descriptions, recommendations for cultivation or any other information provided. The ordering party bears the sole risk and responsibility as to whether the products or the recommended cultivation methods are suitable for the intended cultivation under local conditions. Product illustrations in catalogues, on the internet or in other publications show the variety type of the respective cultivar and not the cultivar as such. These illustrations do not represent a guarantee of the harvest results, neither explicitly nor implicitly.

13. Proprietary Rights, Licenses, Propagation

13.1 The use of intellectual property rights applied by us, including industrial property rights (plant variety protection and trademark protection), copyrights and image rights, is only permitted on the basis of a license agreement. Specifically, those goods that are subject to plant variety protection may only be propagated and multiplied on the basis of a license agreement. Any such license agreement shall be concluded separately, and there shall be no entitlement thereto; the license fees shall be determined in the license agreement.

13.2 In particular, variety protection is based on the respective legal provisions, especially the German Variety Protection Act (Sortenschutzgesetz). The supply of protected varieties by us shall be exclusively for the purpose of cultivation and subsequent sale; the ordering party shall not be authorised to produce propagating material or to export propagating material to any country that does not guarantee plant variety protection, except in cases where this is agreed separately, in writing.

13.3 If mutations/sports occur at the ordering party's premises, they shall inform us immediately, grant us access for inspection and verification and, without being requested to do so, they shall provide us with samples and cuttings of the mutations.

13.4 Should the ordering party be entitled to alleged rights from the identification of the mutation, which they wish to sell or have protected, they shall be obliged to inform us thereof in advance. In all cases, we reserve the right to assert our own rights to mutations.

13.5 In the event of a sale of any rights to mutations to which they may be entitled, the ordering party shall grant us an irrevocable right of first refusal; in the event of planned protection of such rights, they shall agree forthwith, to undertake to offer us the rights of assignment at a reasonable price and, in the event of non-transferability, for exclusive licensing.

13.6 If no agreement can be reached regarding an appropriate price, in the sense of the above clause, an assessor appointed by the Chamber of Agriculture with jurisdiction over us, shall determine an appropriate, binding price.

13.7 The customer shall irrevocably permit us or third parties commissioned by us to inspect his cultivation areas, after prior notification and scheduling, in order to verify compliance with the plant variety protection agreement.

13.8 Without our express written consent, the customer may not use any trademarks and symbols we use, to distinguish its products from those of any other legal entities or companies, and the ordering party is not permitted to use any trademarks and symbols that are not clearly distinguishable from ours. One exception to this is in the case of trading in our original packaging, bearing the trademarks and symbols affixed by us. Another exception applies in the event that the goods were delivered together with labels supplied by us. In this case, the trademarks used on the labels may only be used by attaching the labels supplied for the actual material supplied, in order to maintain the corporate design associated with them.

13.9 Please note that the GGN (GLOBAL GAP number) of Volmary GmbH may only be used for products produced by Volmary GmbH. Please ensure that the GGN is only used in accordance with GLOBAL GAP guidelines, and that it is not abused. Adopt the best possible practices for traceability and labelling of products, e.g. labelling of GAP-certified products at your premises, to exclude mix-ups.

14. Place of Fulfilment

14.1 The place of fulfilment for all services arising from contracts between ourselves and the ordering party shall be Münster in Westphalia (Germany).

15. Court of Jurisdiction

15.1 German law shall apply exclusively. The application of the UN Convention on Contracts for the International Sale of Goods and the applicability of any other conflicting provisions, which may lead to the applicability of other legal systems, including the so-called ROM I Regulation (EC 593/2008 of 17.06.2008), are expressly excluded.

15.2 For any disputes arising from contractual relationships between ourselves and the customer, the court of jurisdiction shall be Münster in Westphalia (Germany), unless a different exclusive court of jurisdiction is provided for by law.

16. Severability Clause

16.1 Should any of the clauses contained in these General Terms and Conditions, or any other clause contained in any contract concluded between ourselves and the customer, be or become invalid, either in their entirety or in part, the rest of the contract shall retain its validity. The parties undertake to replace the invalid clause with an agreement that comes as close as possible to the original intention of the invalid clause, in economic terms.
